BECKMAN

BECAUSE WE FISH

At G. Pucci & Sons, we know there are people who like to fish, but then there is a different breed of angler. These are the insane souls whose every breath of existence draws them to the water, who believe every tide is a new opportunity and each season is a puzzle waiting to be solved.

Caution is not a factor when they're racing across a lake at 70 mph in sub-zero temperatures, dropping a raft off a cliff to find a virgin piece of water, wading a flat in squelching heat, or kayaking out into the deep blue.

We don't judge their sanity or question their dedication. We are just honored to provide gear they can be confident in on their lifelong journey.

TOPWATER

High Performance Copolymer

Topwater has been formulated to have low memory and suppleness while maintaining high abrasion resistance and knot strength. P-Line's newest copolymer gives the angler an advantage when they are throwing their favorite topwater bait. Forrest Wood Cup Champion and MLF Bass Pro Tour angler Bryan Thrift used the line to secure his victory in the 2019 FLW Championship. He credited the line in helping him make long, precise casts to schooling fish. The line is designed with great buoyancy, keeping the bait from swimming below the surface. Engineered with low memory, P-Line's new Topwater Line lays flat on the surface, allowing the angler to effortlessly walk, twitch or crawl a bait with lifelike action.

Available in 10, 12, 15, 17, 20, and 25 pound test.

BRAID

TEFLON® SURFACE PROTECTOR

Green

X-BRAID HI VIS YELLOW

Teflon® Surface Protector

XTCB is now available in low visibility green and high visibility yellow. Many angling situations require a high visibility line. With the success of XTCB-8 in the low vis green, expanding the product family with a more visible line was a natural development. From fishing in the Keys, to casting into the surf, or float fishing a river, anglers are going to love the performance and versatility of this product.

Available in 10, 15, 20, 30, 40, 50, 65 and 80 pound test.

Spools are available in 150, 300 yards.

Hi Vis Yellow

X-BRAID GREEN

Teflon® Surface Protector

P-Line X-Braid is a braided line which features Teflon Surface Protector. It has more abrasion resistance, flows through the guides with less friction and allows for longer casting. XTCB-8 is constructed using 8 strands of fiber during the braiding process, which allows for a braid which is extremely tight and compact, with an ultra smooth finish. X-Braid will also retain its round shape while having a smaller diameter than traditional braids. XTCB is now available in low visibility green and high visibility yellow.

Available in 10, 15, 20, 30, 40, 50, 65 and 80 pound test.

Spools are available in 150, 300, and 2500 yards.

SPIN-X BRAID

Dual Color Braid

P-Line Spin-X Braid is the first spinning reel specific braided line on the market. Every detail has been covered as it relates to what fishermen seek in a performance spinning reel braided line. Featuring a color change from hi-vis blue to hi-vis orange every meter, it is extremely visible on and off the water, making it easy to detect the slightest strike. Constructed using 8-carriers of fiber, Spin-X Braid is manufactured to be incredibly soft and smooth, causing the line to fly off the spool for extra-long casts and quick descents.

Available in 8, 12, 16, 20, and 24 pound test in 150 yard spools.

SPIN-X FLUOROCARBON

Ultimate Spinning Reel Leader

P-Line Spin-X Fluorocarbon Leader has been engineered to be the ultimate spinning reel fluorocarbon leader. Utilizing 100% pure Japanese fluorocarbon, Spin-X Fluorocarbon Leader is incredibly clear and holds very little memory, making it perfect for tying long leaders for finesse techniques. Featuring high abrasion resistance and superb knot strength, Spin-X Fluorocarbon Leader has been produced for serious spinning reel enthusiasts. Pair these attributes with new, sought after line sizes, and Spin-X Fluorocarbon Leader will be your new go-to leader material for all spinning gear.

Available in 5, 7, 9, 11, and 13 pound test in 50 yard spools.

FLUOROCARBON

Tactical Fluorocarbon

Premium Fluorocarbon

Your success as an angler depends on the tactical decisions you make long before you get to the water. You need every advantage possible to compete with the serious anglers of today and that starts with your line! Longer casts and extreme invisibility are just a few of the benefits you get when you spool P-Line Tactical Fluorocarbon.

Because Tactical is derived using the latest in technology and extrusion advancements you can head to the water knowing you're spooled with the strongest, extremely castable fluorocarbon available. Available in 6-20lb. test in 200 and 1,000 yard spools.

Fluorocarbon

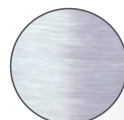

The Gold Standard for Fluorocarbon

P-Line Fluorocarbon is extruded from the highest quality Japanese fluorocarbon crystals, ensuring the best knot and breaking strength available in a soft fluorocarbon line.

As the educated angler knows, fluorocarbon has a refractive index very close to that of water, making it invisible once it enters the water.

P-Line Fluorocarbon is hydrophobic absorbing very little water giving it great knot strength. The low stretch factor means increased sensitivity to feel even the lightest strikes.

FLUOROCARBON COATED

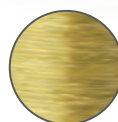

8

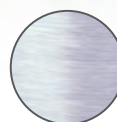

CX Premium

Premium Fluorocarbon Coated

P-Line's CX Premium Fluorocarbon Coated Line is one of the most innovative lines available, combining copolymer and fluorocarbon technologies. With low memory and improved limpness, CX Premium eliminates the line nightmares of a spinning reel, and improves casting distance with a baitcasting reel. The fluorocarbon-silicone coating virtually eliminates water absorption, so cold water and weather have little effect on line performance. With as much as 30% less stretch than average lines, it has increased sensitivity to detect and react to even the most subtle strikes.

Floroclear

Fluorocarbon Coated ~ Copolymer Stealth

With Floroclear's fluorocarbon coating the line is virtually invisible once it enters the water. This gives anglers the advantage of a more stealthy presentation, which will guarantee more strikes and hookups. With a special silicone treatment, Floroclear has reduced memory and increased castability. From small finesse baits for bass to huge plugs for stripers in the surf, this line just plain casts.

CXX X-TRA STRONG

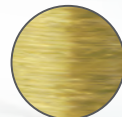

10

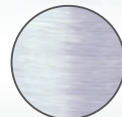

CXX X-Tra Strong

The Ultimate Copolymer

CXX X-Tra Strong is the toughest, strongest, most shock resistant line on the market. If you're looking to throw into nasty cover for largemouth, battle huge tuna with your drag locked down to some ridiculous setting, or pull plugs for monster salmon in a raging river, there is only one line to trust. Tournament anglers and guides alike choose CXX because of the abrasion resistance and its high strength to diameter ratio. And with 5 colors to choose from, you're certain to have the perfect shade for any condition.

COPOLYMER

Smoke Blue

PF Original

The One that Started it All

When P-Line Original was first introduced to anglers in the United States, a new era in copolymer line technology emerged. With its small diameter and a soft supple finish P-Line Original line became an instant hit with both saltwater and freshwater fishermen, who for the first time were realizing the advantages that a high quality copolymer line could deliver.

P-Line Original's smaller diameter gives anglers increased spool capacity while maintaining a high breaking strength. It also enhances presentation of both live bait and lures.

C21

Quality Copolymer ~ Great Price Point

C21 is the latest addition to the P-Line family and is sure to raise the bar of what anglers can expect from an economically priced line. This copolymer line is made with Japanese raw materials and technology. The ultimate goal of our engineers' was to create a line that bridged the gap between two of our most popular lines, CX-Premium and CXX X-Tra Strong, while maintaining a great price point. Castability is the most important attribute for an angler, and C21 delivers with a soft construction which literally flies off the reel with virtually no memory. A copolymer line made with two types of nylon, C21 synergistically creates the ultimate line for spinning or bait casting reels, without putting a big dent in your wallet!

LEADER MATERIAL

Gulf Coast Slam

Specialty Fluorocarbon Leader

P-Line's Gulf Coast Slam Fluorocarbon Leader was built to perform in the harsh conditions served up by the Gulf of Mexico. Whether you're launching Top Dogs across the flats of Matagorda Bay, soaking a croaker under a float down in Port O'Connor, or fishing off the oil rigs of Venice, GCS has the strength, durability, and invisibility to not only get bit, but to also put that fish in the boat! The production of GCS starts with using the best quality Japanese raw materials available and is manufactured using the latest in extrusion technology. Your target species might be speckled trout, redfish and flounder, but life in the Gulf is endless and you never know when you might be scrapping with a huge tarpon, a toothy king mackerel, or a powerful amber jack, which is why you need the toughest, strongest, most abrasion resistant fluorocarbon on the market, Gulf Coast Slam!

Available in 10-50lb. test in 50 yard spools.

SS Fluorocarbon Leader

Salmon & Steelhead Leader

SS Fluorocarbon Leader was designed specifically for Salmon and Steelhead fishermen. The extreme invisibility of the line once it enters the water is one of the attributes which make it the perfect choice when fishing clear water conditions. SS Fluorocarbon has the toughness and abrasion resistance needed to be an awesome leader line, while maintaining enough flexibility to tie great knots. With the latest advancements in fluorocarbon raw materials and extrusion technology this product will raise the bar of what anglers come to expect out of fluorocarbon leader material.

Available in 6-40lb. test in 100 yard spools.

CFX Fluorocarbon Leader

100% Fluorocarbon Leader

CFX Fluorocarbon's refractive index makes it virtually invisible once it enters the water. The most obvious advantage of CFX Fluorocarbon is a more natural presentation to the fish. With its high abrasion resistance, low stretch factor and UV protectors it's no wonder that when it was introduced, the American Sportfishing Association awarded P-Line CFX Fluorocarbon "Best New Line Introduction of the Year". If you're in conditions with line-shy, leader-shy fish, using CFX Fluorocarbon can make the difference between excuses why they didn't bite, or the bragging rights of that catch of a lifetime. This could be the most important tool you add to your tackle arsenal.

Shinsei

100% Pure Japanese Fluorocarbon

Not all fluorocarbons are created the same. To produce the perfect fluorocarbon you have to start with the best raw materials attainable, which is the foundation for our Shinsei fluorocarbon.

By using the purest, cleanest fluorocarbon crystals available we have produced the most invisible fluorocarbon on the market. After spending a tireless amount of hours in research and development with a team of Japanese engineers we have developed the perfect combination of strength, stretch and durability. The end result is a product which will absorb shock, while having the attributes needed for tying the perfect leader, or creating the ultimate top-shot. Whether you're fishing for huge tuna or stealthy steelhead Shinsei is the clear choice for leader material. Available in 2 - 200lb. Test 25 meters/27 Yards.

Original Leader

Copolymer Leader

For years P-Line Original Leader has set the standard for the serious fisherman. Its combination of supple feel, knot strength and abrasion resistance makes it one of the most dependable leaders available in the market. It's great for trolling lures or fly lining a bait to a waiting marlin. It also has the toughness to handle the battle that follows.

CXX X-Tra Strong Leader

Legendary CXX Strength in a Leader - Moss Green

Now anglers can have our CXX X-Tra Strong line in convenient stackable leader spools. This leader material has the same great knot strength and abrasion resistance as our entire CXX family of products. You now have more flexibility than ever before to meet the challenge of any fishing condition with a combination of CXX line and leaders.

Hydrofloat

Floating Spectra® based line

Hydrofloat is a Spectra based line with a thermal fused coating. While originally designed for float fishing for both salmon and steelhead, Hydrofloat can be used in many applications and works well on both spinning and baitcasting reels.

The fused coating of Hydrofloat makes this line more buoyant than traditional Spectra lines, allowing the angler to have a drag free drift by always being able to see and manage the line on the surface.

When making long drifts anglers will appreciate the fact that Hydrofloat has virtually no stretch, which allows an angler to have a positive hook-set on extended drifts. Hydrofloat also has a high strength to diameter ratio. Available in 10, 15, 20, 30 & 50 lb. test.

Angry Eye Predator

Shallow Diving Jointed Minnow

The Angry Eye Predator is a versatile 6 1/2 inch jointed minnow bait. If trolling is your preferred method of angling, the AEP will run at a depth range of 2-7 feet. Fish the AEP with a slow retrieve and a high rod tip and you can work the bait on the surface. The jointed body design ensures an erratic motion which allows the lure to really hunt for any species. With 3 counter balanced weights in the body of the AEP, and 6 hollow bb's in the center cavity, you can rest assured that you'll have the action and the vibration needed in any type of water conditions. Whether you're chasing huge snook, cagey lake trout or monster striped bass, the AEP is a clear choice for your path to success.

Predator Minnow

Deep Diving Jointed Minnow

The P-Line Predator is a deep diving, jointed bait with an action that makes it irresistible to many species of game fish, most notably striped bass. Trolled at 3-mph with 100 feet of line, the Predator will dive 12 to 13 feet. These lures are catching fish from coast to coast, in both salt and fresh water, under any conditions. The Predator features 3 counter balanced weights in the body of the lure which ensure great action and balance. The main body also has 6 hollow stainless steel BB's which create an irresistible rattling noise, attracting fish in the murkiest of water.

Laser Minnow

The Number One Jigging Minnow

The P-Line Laser Minnow is manufactured with a unique holographic laser tape, creating an amazingly life-like finish. The oblong shape and sharp cuts on the side allow for an erratic action when jigged. This action will trigger strikes from a number of species. The smaller sized Laser Minnows are effective in fresh water for Bass, Trout, and Kokanee; the medium sizes are effective on Lake Trout, Striped Bass and Salmon. While larger sizes were designed for Albacore, Dorado, and any type of bottom fish such as Halibut, Ling Cod or Rockfish.

'Sassin Jig New Jigging Minnow

The 'Sassin has a unique cupped design on one side and the scaled finish on the other half of the body. The lure is rigged with a Mustad 3X strong hook, a solid welded ring, and a crane swivel on the eye of the lure. With the unique scaled finish and the cupped design, these jigs have an amazing flash. The 'Sassin also features two oversized, offset eyes for an even more life-like look! With the evolution of anglers using smaller jigs to catch huge fish, it was important to use great quality components. In both saltwater and freshwater, the 'Sassin has proven deadly, enticing tuna, bottom fish, rock cod, ling cod, salmon and striped bass. The 'Sassin is available in 1, 2, 3, 4 & 6 oz.

Tinsel Inserts

P-Line Tinsel Inserts added to the inside of any squid bait will enhance the look and action of the bait. By using a combination of mylar, and crystal flash, which are then embedded in a soft rubber head, these inserts are easy to use, and extremely effective. Available in 3 styles at 2.5", 4.5" and 5"

Geisha Squids

The 2.5" Geisha Squid has been designed with a unique, hand tied set of shimmer scales. These scales impart an erratic action which cause the skirt to pulsate and swim without the need for a dodger. The Geisha Squid was designed as a trolling bait, and is UV enhanced for maximum attraction. Available in twelve color patterns, including 5 glow colors.

Mini Sunrise Squids

A smaller 1.5" version of our popular Sunrise Squid skirts.

Twin Tail Squid

Live Action Twin Tails

The P-Line Twin Tail Squid is a versatile saltwater bait which is available in 4.5", 7" and 9 inch models. There are 6 colors in the assortment including 3 glow colors for low light and deep-water fishing conditions. The tentacles on this squid include two curl tailed legs which have amazing action and are guaranteed to entice vicious strikes from hungry gamefish. These squid bodies can be rigged on leaders for halibut and bottom fish, fished on jig heads for lingcod and rockfish or trolled for pelagics. Just about every fish in the ocean feed on squid so your only limitation is your imagination when it comes to rigging and fishing the new Twin Tail Squid.

Twin Tail Halibut Leader

Our proven lineup of halibut leaders get an exciting addition with the new 7" Glow Twin Tail Squid added to the family. Because monster halibut live in deep, dark water we have added an extremely bright natural glow Twin Tail Squid to this leader, the tentacles on this bait include two curl tail legs which are sure to provide additional action when the current is running or the leader is jigged off the bottom. The leader features compression crimps, 300 lb. P-Line Original Leader material, and stainless steel circle hooks, available in 14/0, 15/0 and 16/0.

Bottom Fish Rigs

This assortment of two hook saltwater rigs are made specifically for fishing around reefs, rock piles, and wrecks. We offer Lingcod Rigs, Rockfish Rigs and Bottom Fish Grubs, the perfect assortment for what you're after.

Bottom Fish Grubs

Bottom Fish Grubs are rigged with two 4.25 inch hook tail grubs glued onto 7/0 hooks. The leader is 50 lb. test and is 40 inches long. These grubs have amazing fish attracting action and are available in 5 colors. When you explore the depths of your favorite reef the P-Line Bottom Fish Grub rig is a great option.

Ling Cod & Rock Cod Rig

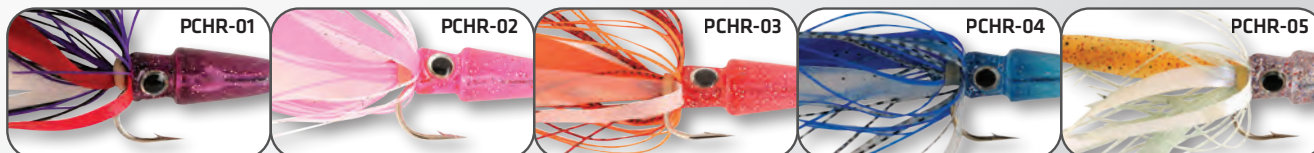

The Ling Cod Rig (PLCS45) is tied on 50 pound leader and rigged with two 7/0 hooks and two 4.5 inch bulb squids. There are 13 colors including 3 glow colors to choose from. Big ling cod love squid and octopus and these rigs have proven to be effective in tricking many lings into their last meal. The Rock Cod Rig (PRCS35) is a smaller version of the highly effective Ling Cod Rig. At 3.5 inches these squid are the perfect length for school sized rockfish. This version is also tied on 50 pound leader, but uses a smaller 5/0 hook. When it's time to load the cooler with a limit of Rock Cod you'd better have one of these rigs in your arsenal.

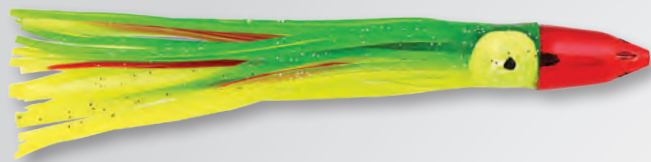

ROCK COD SQUID 3.5 INCH

MFG # PRCS35-(COLOR CODE)
MFG# PLCS-45 (COLOR CODE)

Conehead Squid

The Conehead Squid is the newest addition to our saltwater lineup of bottom fishing products. This lure comes rigged on a 5 foot leader tied with 60 pound P-Line Leader Material. To the bottom of the leader you can attach your favorite jig such as a Diamond Bar, Laser Minnow, or Halibut Drop Jig. Thirty inches above the jig the Conehead squid is rigged on a loop knot which allows for maximum action. The Conehead itself is made of a sparkled acrylic, with oversized eyes, and 3 different types of tentacles. You're now able to fish two different profiles of baits, increasing your chance at success.

Tuna Ripper

The Tuna Ripper is a 1.7 ounce jet head designed with 5 ports that allow water to run through the bait, causing the ultimate bubble trail. And with 5 metallic head finishes and 10 skirt combinations, we've provided the ultimate tuna color combinations.

Pro-Steel Spoons

The Pro Steel lure was designed with the perfect cup and edges to give you the ultimate action. Equipped with a Siwash hook and a treble hook, P-Line has built a spoon which can be fished right out of the package.

For best results the spoon should be swung through potential holding water by casting across the river, let the spoon sink and then allow the current to pull your line down stream coupled with a slow retrieve. This presentation should give you the perfect action to entice strikes.

Available in 10 color combinations at 1/4, 2/5 and 2/3 ounce sizes. 6 to Pack.

Sabikis

Combining the stealth of fluorocarbon with the attraction of a red hook, P-Line's lineup of Sabikis will help anglers catch baitfish in the toughest of conditions.

Fluorocarbon Red Hook Sabikis

Fluorocarbon Sabikis are available with real fish skin, and real fish skin with mylar strands, tied on extremely sharp red hooks. Available in sizes 14, 12, 10, 8, and 6.

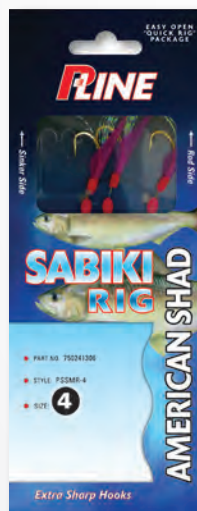

Gold Hook Sabikis

Gold Hook Sabikis are available with real fish skin, and real fish skin with mylar strands, tied on extremely sharp gold hooks. Available in sizes 14, 12, 10, 8, and 6.

Mylar Sabikis

Mylar Sabikis are equipped with reflective mylar wrapped, tied to extremely sharp gold hooks. Available in sizes 14, 12, 10, 8, 6, 4 and 2.

34

Live Rubber Sabikis

The P-Line Live Rubber Sabiki is designed to emulate a small shrimp or krill. With a light pink body tied onto a gold hook we've created the ultimate bait catching rig. The six hook rig is packaged on an easy to use card with directions. Available in sizes 14, 12, 10, 8, and 6.

American Shad Sabikis

The Shad Sabiki is designed to make fishing for this popular species as simple and effective as possible. Simply attach enough weight so your rig will stay in contact with the bottom. A slight jiggling motion will bring the fish skin mylar combination to life, ensuring violent strikes. All are equipped with 3, size 4 hooks and are available in chartreuse, red and natural.

Micro Squid Sabikis

Micro Squids feature a line through the weighted head design for a perfect presentation. Available in 4 and 2 hook variations in 2 sizes # 4 and 1/0. Size 4 is a 4 hook and size 1/0 is a 2 hook.

Popcorn Krill

The P-Line Popcorn Krill is a two hook feather rig which has proven to be deadly effective on a number of species including rockfish and ling cod. The Popcorn Krill are rigged on a single leader with two 5/0 hooks and are available in 6 color combinations. What separates this rig from our popular Farallon Feather Rig is the addition of a bulky head which creates a larger presentation in the water, and also provides a good surface to add scent without impairing the action of the feather.

P-Line draggin' Ball typical set up for Bobber Doggin'.

Bobber Weight Internal Structure

Draggin' Balls

Draggin Balls were created to be used under a float while bobber dogging. This new P-Line product is a steel ball with a rubberized coating specifically designed to drift more freely than lead because of the increased mass. Because the ball will drift with the current and bounce off of rocks it dramatically reduces snags. The ball is attached to a rolling swivel which turns 360 degrees so line tangles caused by your weight should be non-existent. Draggin Balls are available in 1/8, 1/4, 1/3, 1/2, 3/4 ounce.

Order #	Description	Model

750-28-2315	P-Line Steel Draggin Balls 3/4 oz 3Pk	PLSDB 3/4

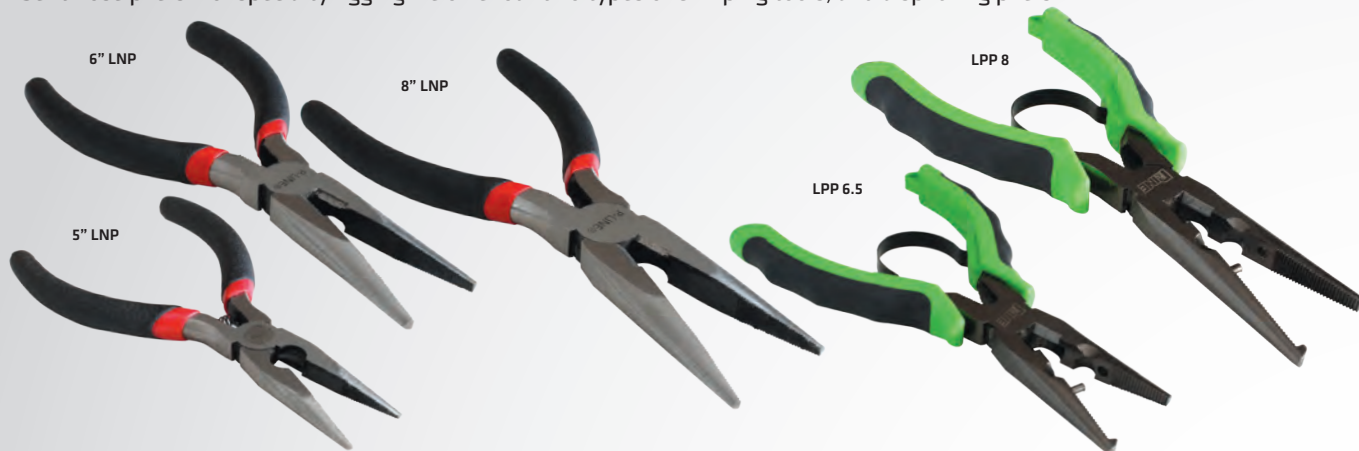

P-Line Bobber Weights

The P-Line Bobber/Trolling Weight has a wire which connects both swivels through the inside of the weight. The lead helps to get your bait down quickly and improves your ability to properly weight the float. This same weight can be added as an inline trolling sinker for Trout and Kokanee fishing to help get your lure down to the proper depth. Available in 1/4, 3/8, 1/2, 5/8, 3/4 and 1 ounce.

Sliding Swivels

The Sliding Swivel is a must for any fisherman looking for an extra advantage when it comes to bait fishing. This unique swivel is used to attach your weight above your leader. Since the swivel is not fixed, a fish can swim away with your bait without feeling your weight.

Halibut Sliding Rigs

Halibut sliding rigs allow the bait to swim freely, while keeping it very close to the bottom, the target strike zone for halibut. The sliding weight system allows the strike to be seen on the tip of the rod, before the halibut feel the weight of the sinker. This rig is available with and without a stinger. Rig with stinger is shown. 1 to a pack. 12 to a box.

Order #	Size	Line	Stinger	Model

Gamakatsu

Sturgeon Rigs

With the new California Sturgeon regulations, you must fish with a single barbless hook which is why Pucci has made 16 different versions of rigs. You have the choice of a high end rig made with a Gamakatsu Octopus hook, or a more economically priced Khale style hook. The rigs are made with crimped wire leader and are available with or without a slider in 5/0, 6/0, 7/0, and 8/0. All models are barbless.

Fill with water to
your required weight.

Clear Spin Floats

Clear spin floats have been a secret of trout fishermen for many years. This float allows a spin fisherman to cast small lures and flies a great distance by simply filling the float with water. The float can be fished at different depths depending on how much water is in the float.

2 Pack.

12 packs to a box. Best result with 5' to 7' of leader.

Float Stoppers

The Pucci float stoppers are made of a soft rubber amber material. Available in 3 sizes which allow you to match the correct sized stopper to your line diameter. This popular product will not only act as a float stopper, bass fishermen are now using stoppers to peg sinkers. Another use for these stoppers are to secure egg beads for trout and steelhead anglers. A must for any tackle box!

Feature:

Barrel Interlock swivel for easy installation.
Just slide on your line.

Pier Floats

The Pucci Pier Float is a high density foam float with a wire through the body construction. The float will test at over 75 pounds of pressure. The top of the float has a barrel/interlock swivel which allows you to easily snap the float onto your line, and the high visibility colors make the pier float extremely easy to see in any water conditions.

BECKMAN SIGNATURE FEATURES

BECKMAN HANDLES

Each Beckman net offers the choice of a 4', 6' or 4'-7' and 6'-9' extendable handle.

QUICK CONNECT CHANNEL

The Beckman Quick Connect Channel allows for an ultra-fast connection of the handle to the yoke.

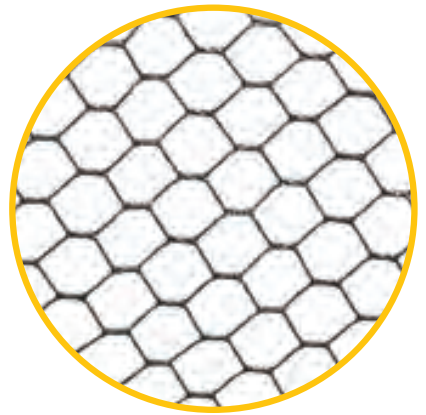

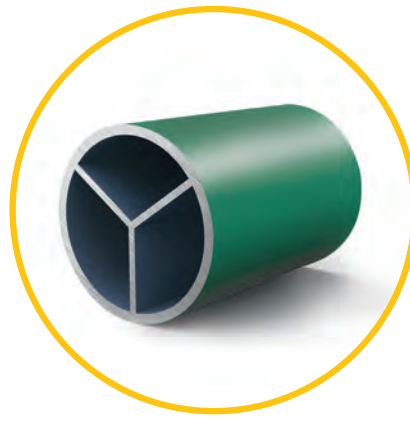

ONE PIECE YOKE

One of the signature features of Beckman is the incredibly durable once piece aluminum yoke which comes with a lifetime guarantee. The yoke is built with 1100 Aluminum and is connected to the hoop with 4 stainless steel screws and washers.

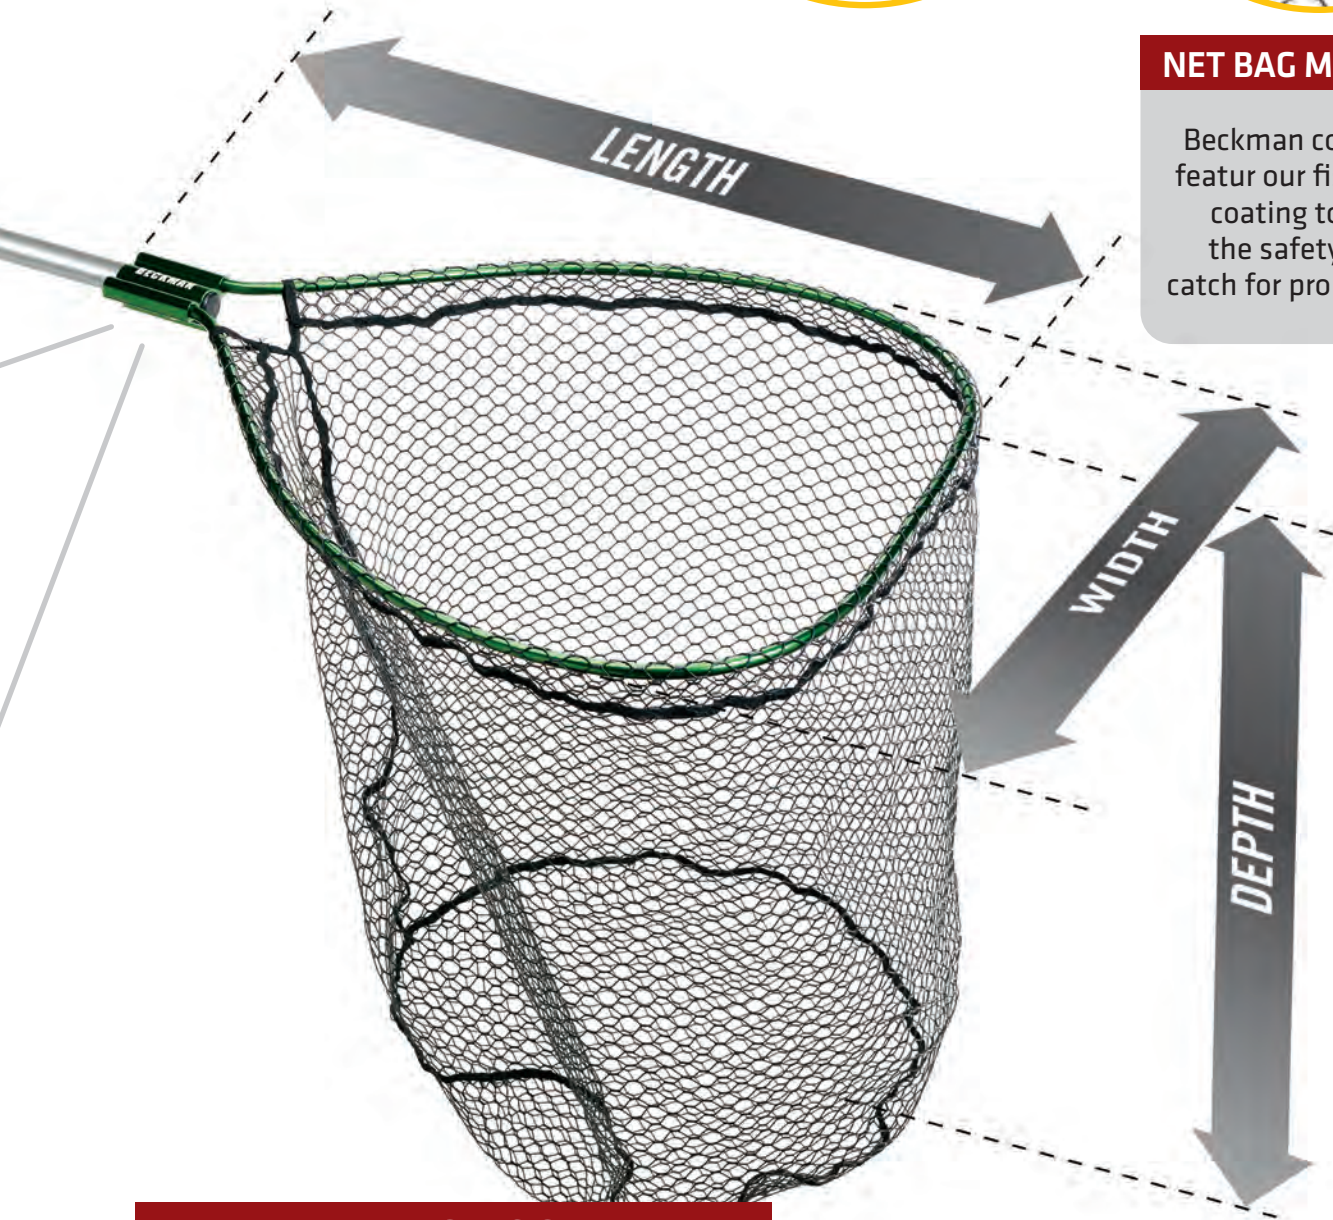

Y-BAR HOOP CONSTRUCTION

Most Beckman hoops feature an Internal Y-Bar construction which adds strength, rigidity, and directional stability to the hoop.

NET BAG MATERIAL

Beckman coated nets feature our fish-friendly coating to ensure the safety of your catch for proper release.

NET BAG DESIGN

Beckman Coated and PVC nets are designed to be fish friendly with a flat bottom which helps to reduce the stress on a fish prior to release. Nylon nets are designed to be extremely durable and have the ability to scoop very quickly in the water with less drag.

BECKMAN COATED NETS

BN3446C

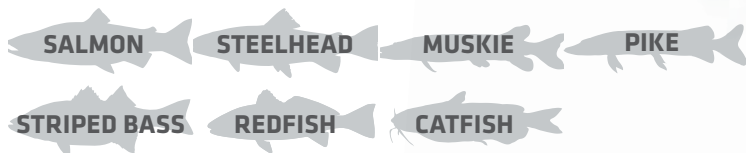

The BN3446C measures 34" wide by 46" long, with a 44" deep, flat bottom coated net bag. This net features our Quick-Connect Channel that allows for a fast connection of the handle to the yoke. The hoop features our internal Y-Bar construction for increased rigidity and stability. Our durable one-piece aluminum yoke comes with a lifetime guarantee. The BN3446C is sold with your choice of handles.

BECKMAN PVC NETS

BN1720P-32

The BN1720P-32 is a collapsible handle PVC fishing net that measures 17" wide by 20" long. The fish-friendly net bag is 20" deep and features a flat bottom to secure and support the fish while helping to eliminate rolling. The PVC net material eliminates any likelihood of injury to the fish and reduces hook tangles. This net features our Quick Storage Handle for a reduced storage profile. When fully extended the net is 49" long. In storage mode, the net is approximately 33" long.

MFG #	ORDER #	SIZE: W x L x D	TYPE	HANDLE LENGTH
BN1720P-32	750-44-1950	17" x 20" x 20"	PVC	32" COLLAPSIBLE HANDLE

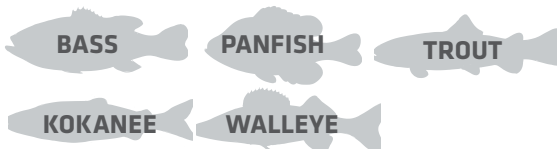

REDUCED STORAGE PROFILE

The BN1720P-32 and the BN1924P-42 feature our Quick Storage Handle that allows the handle to collapse into the net, creating a more compact footprint for storage.

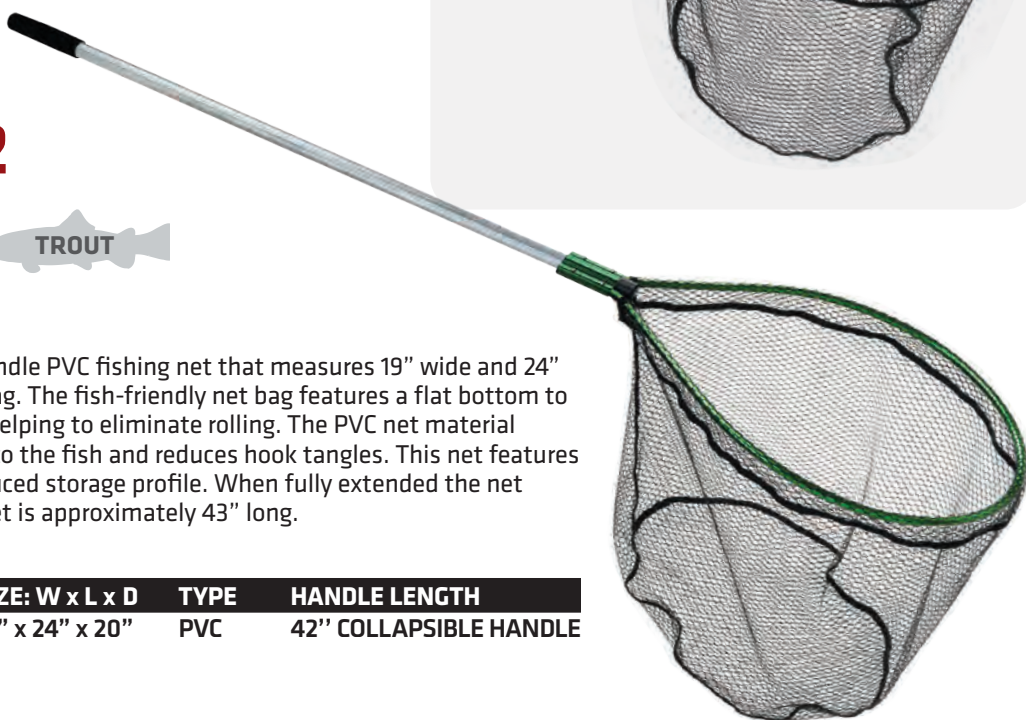

BN1720P-32

BN1924P-42

The BN1924P-42 is a collapsible handle PVC fishing net that measures 19" wide and 24" long and has a 20" deep PVC net bag. The fish-friendly net bag features a flat bottom to secure and support the fish while helping to eliminate rolling. The PVC net material eliminates any likelihood of injury to the fish and reduces hook tangles. This net features our Quick Storage Handle for a reduced storage profile. When fully extended the net is 63" long. In storage mode, the net is approximately 43" long.

TWIST LOCK HANDLE

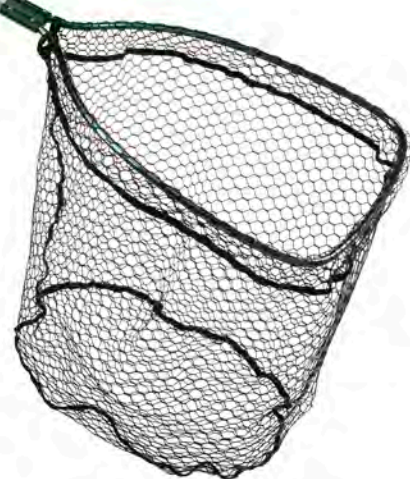

The BN1822P-44 features a twist lock handle that can quickly and easily change from a 4" to an 8' handle.

BN1822P-44

Built with the kokanee/trout angler in mind, the Beckman BN1822P-44 is lightweight and measures 18" wide and 22" long with a 12" deep flat bottomed PVC net bag. The handle extends to over 8 feet in length. The squared hoop design and added length ensures even the most agile of fish can't escape. The coated bag makes for easy hook removal and fish care. Constructed with a twist lock so the angler can choose between a 4'-8' handle.

BN1822P-44	750-44-1910	18" x 22" x 12"	PVC	4' -8' EXTENDABLE HANDLE

97

BN1116C-7

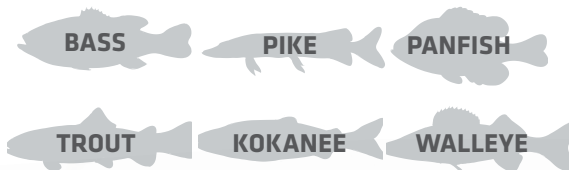

The BN1116C-7 measures 11" wide and 16" long and has a 12" deep PVC net bag. It was built with the serious trout angler in mind. Constructed with a lanyard, the angler can attach it to a belt or buckle and keep it close for netting. The pvc bag keeps hooks tangle free and is great on the fish. The lightweight aluminum makes netting and carrying a net effortless.

EXTEND YOUR REACH

The Beckman H43 & H63 Handles are extendable. The H43 extends from 4' to 7'. The H63 extends from 6' to 9' in length. They both feature our Quick-Connect Channel that allows for a fast connection of the handle to the yoke.

BECKMAN ROD RACK

The Beckman Rod Rack will help you manage your rods in your drift boat, pontoon boat or garage. The kit comes with all of the hardware needed for easy installation. There are 4 rod holders which can also be used to secure a net or gaff handle. It can be mounted horizontally or vertically and will help keep your rods evenly spaced to prevent unnecessary wear and tear.
