BECAUSE WE FISH

The Obsessed. The Driven. The Unreasonable.

At G. Pucci & Sons, we understand that for some, fishing isn't a hobby, it's a haunting. There is a specific breed of angler who doesn't just visit the water; they belong to it. These are the restless souls who view every tide as a summons and every change in season as a complex riddle that demands an answer.

They are the ones who find comfort in the extreme. Piercing the gale at 70 mph across a half-frozen lake. Hauling a raft down a sheer cliff side to touch untouched water. Enduring the salt-crusted heat of a midday flat. Paddling into the horizon where the deep blue swallows the shore.

Where others see a lack of caution, we see a rare kind of clarity. We don't question the sanity behind the pursuit or the grit required to sustain it. Instead, we consider it our highest honor to build the gear that stands up to their obsession. ***Because We Fish.***

EndurX 4

Zero Fade Braid

EndurX 4 by P-Line sets a new standard for braided fishing lines, delivering unbeatable strength, durability, and value. This 4-carrier braid is available in three bold colors—Monster Green, Aqua Blue and Hi Vis Orange—and is the only braid on the market backed by a lifetime no-fade warranty. That's right—EndurX 4 is guaranteed to retain its color for life. It also features AquaShield, a proprietary coating that reduces water absorption and helps resist freezing, making it the perfect line for cold-weather anglers. Built for serious fishermen who demand performance and reliability, EndurX 4 stands alone as the smart choice for every fishing adventure.

Available in 10, 15, 20, 30, 40, 50, 65 and 80 pound test.
Spools are available in 150, 300, and 3000 yards.

BRAID

EndurX

Zero Fade Braid

EndurX braid combines eight-carrier construction, yielding a high strength-to-diameter ratio and a low-friction, silky surface, with a revolutionary "No-Fade" raw material that is colored prior to the braiding process. This ensures unparalleled pigment retention and virtually zero stretch, allowing EndurX to maintain its original vibrance for years, and that's backed by our lifetime guarantee against fading.

Now expanding its lineup to include Hi-Vis Orange and the offshore-optimized Aqua Blue, the EndurX family delivers consistent, high-performance castability and permanent color stability across all big-game and blue-water applications.

Available in 10, 15, 20, 30, 40, 50, 65, 80 and 100 pound test.
Spools are available in 150, 300, and 2500 yards.

Aqua Blue

Monster Green: Blends into vegetation and stained water; ideal for camouflage in heavy weeds or timber.

Electric Green: High-visibility for line watching in clear water; helps detect subtle bites or line movement.

Midnight Black: Creates a sharp silhouette against the sky; effective for topwater lures or fishing at night.

Hi-Vis Orange: Maximum visibility for trolling or vertical jigging; easy to track in low-light and murky conditions.

Aqua Blue: Best for offshore saltwater; disappears into the deep blue ocean while remaining visible above water.

AQUA SHIELD

Your Cold Weather Advantage

AquaShield is our proprietary coating engineered to give you the edge when the temperature drops. This advanced finish significantly reduces water absorption, which is the key to preventing ice buildup on your line. By helping to resist freezing, AquaShield maintains the line's suppleness and sensitivity, making it the perfect line for cold weather anglers who demand peak performance when others are packing up.

XTCB *Tough Coated Braid*

Slick Coat

P-Line XTCB, Xtra Tough Coated Braid features our Slick Coat surface protector. It has more abrasion resistance, flows through the guides with less friction and allows for longer casting. XTCB is constructed using 8 strands of fiber during the braiding process, which allows for a braid which is extremely tight and compact, with an ultra smooth finish. XTCB will also retain its round shape while having a smaller diameter than traditional braids. XTCB is now available in low visibility Moss Green and Hi Vis Yellow and Hi Vis Orange.

Available in 10, 15, 20, 30, 40, 50, 65 and 80 pound test.
Spools are available in 150, 300, and 2500 yards.

XTCB *Tough Coated Braid*

Slick Coat

XTCB, which stands for Xtra Tough Coated Braid, now comes in a distinct Hi Vis Yellow that is designed to stand out on the water. This 8-carrier braid features a slick, round profile for improved castability and a quieter fishing experience with less friction on your guides while casting and retrieving. The high-visibility yellow offer excellent on the water visibility, making them the ideal choice for many angling applications, especially salmon and steelhead anglers who demand precision and performance.

Available in 10, 15, 20, 30, 40, 50, and 65 pound test.
Spools are available in 300 yards.

SPIN-X *Metered Braid*

Built for Spinning Reels

P-Line Spin-X Braid is the first spinning reel specific braided line on the market. Every detail has been covered as it relates to what fishermen seek in a performance spinning reel braided line. Featuring a color change from hi-vis blue to hi-vis orange every meter, it is extremely visible on and off the water, making it easy to detect the slightest strike. Constructed using 8-carriers of fiber, Spin-X Braid is manufactured to be incredibly soft and smooth, causing the line to fly off the spool for extra-long casts and quick descents.

Available in 8, 12, 16, 20, and 24 pound test in 150 yard spools.

FLUOROCARBON

Clear

Tactical Fluorocarbon

Premium Fluorocarbon

Your success as an angler depends on the tactical decisions you make long before you get to the water. You need every advantage possible to compete with the serious anglers of today and that starts with your line! Longer casts and extreme invisibility are just a few of the benefits you get when you spool P-Line Tactical Fluorocarbon.

Because Tactical is derived using the latest in technology and extrusion advancements you can head to the water knowing you're spooled with the strongest, extremely castable fluorocarbon available. Available in 6-20lb. test in 200 and 1,000 yard spools.

Fluorocarbon

The Gold Standard for Fluorocarbon

P-Line Fluorocarbon is extruded from the highest quality Japanese fluorocarbon crystals, ensuring the best knot and breaking strength available in a soft fluorocarbon line.

As the educated angler knows, fluorocarbon has a refractive index very close to that of water, making it invisible once it enters the water.

P-Line Fluorocarbon is hydrophobic absorbing very little water giving it great knot strength. The low stretch factor means increased sensitivity to feel even the lightest strikes.

FLUOROCARBON COATED

CX Premium

Premium Fluorocarbon Coated

P-Line's CX Premium Fluorocarbon Coated Line is one of the most innovative lines available, combining copolymer and fluorocarbon technologies. With low memory and improved limpness, CX Premium eliminates the line nightmares of a spinning reel, and improves casting distance with a baitcasting reel. The fluorocarbon-silicone coating virtually eliminates water absorption, so cold water and weather have little effect on line performance. With as much as 30% less stretch than average lines, it has increased sensitivity to detect and react to even the most subtle strikes.

Floroclear

Fluorocarbon Coated ~ Copolymer Stealth

With Floroclear's fluorocarbon coating the line is virtually invisible once it enters the water. This gives anglers the advantage of a more stealthy presentation, which will guarantee more strikes and hookups. With a special silicone treatment, Floroclear has reduced memory and increased castability. From small finesse baits for bass to huge plugs for stripers in the surf, this line just plain casts.

CXX X-TRA STRONG

CXX X-Tra Strong

The Ultimate Copolymer

CXX X-Tra Strong is the toughest, strongest, most shock resistant line on the market. If you're looking to throw into nasty cover for largemouth, battle huge tuna with your drag locked down to some ridiculous setting, or pull plugs for monster salmon in a raging river, there is only one line to trust. Tournament anglers and guides alike choose CXX because of the abrasion resistance and its high strength to diameter ratio. And with 5 colors to choose from, you're certain to have the perfect shade for any condition.

SMOKE BLUE - Smoke Blue was introduced to give anglers the opportunity to match specific saltwater conditions.

FLUORESCENT GREEN - Developed to meet the demands of anglers who need to manage their line while out on the water.

MOSS GREEN - Salmon and steelhead fishermen and tournament bass anglers prefer this stealthy, translucent moss green color.

HI-VIS - P-Line HI-VIS Clear Fluorescent line when an angler must watch the line to detect strikes (flipping and drift fishing).

CRYSTAL CLEAR - More anglers prefer clear line than any other color. Perfect for any water condition.

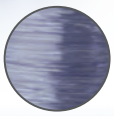
COPOLYMER



Smoke Blue

PF Original

The One that Started it All

When P-Line Original was first introduced to anglers in the United States, a new era in copolymer line technology emerged. With its small diameter and a soft supple finish P-Line Original line became an instant hit with both saltwater and freshwater fishermen, who for the first time were realizing the advantages that a high quality copolymer line could deliver.

P-Line Original's smaller diameter gives anglers increased spool capacity while maintaining a high breaking strength. It also enhances presentation of both live bait and lures.

C21

Quality Copolymer ~ Great Price Point

C21 is the latest addition to the P-Line family and is sure to raise the bar of what anglers can expect from an economically priced line. This copolymer line is made with Japanese raw materials and technology. The ultimate goal of our engineers' was to create a line that bridged the gap between two of our most popular lines, CX-Premium and CXX X-Tra Strong, while maintaining a great price point. Castability is the most important attribute for an angler, and C21 delivers with a soft construction which literally flies off the reel with virtually no memory. A copolymer line made with two types on nylon, C21 synergistically creates the ultimate line for spinning or bait casting reels, without putting a big dent in your wallet!

LEADER MATERIAL

PelagX

Salt Water Fluorocarbon Leader

The saltwater environment is unforgiving to those who show up to the game unprepared; every link of your tackle needs to work flawlessly when it comes to chasing huge fish, which is why the team at P-Line developed PelagX Fluorocarbon Leader Material. Advanced angler expectations motivated the engineers at P-Line to use the highest quality Japanese raw materials and extrusion technology to create the toughest, clearest, strongest, most abrasion resistant saltwater fluorocarbon leader material available!

Available in 20, 25, 30, 40, 50, 60, 80, 100, 130, 150 and 200 pound test. 20-80 pound test in a 50 yard wrist spool. 100-200 pound test in a 30 yard wrist spool.

- **The strength and durability needed for slow pitch and deep drop fishing**
- **The ultimate invisibility for fishing live bait**
- **Unmatched abrasion resistance for long battles**
- **The toughness and shock resistance needed for vicious strikes when trolling**
- **Easy to use wrist spool**

Shinsei

100% Pure Japanese Fluorocarbon

Not all fluorocarbons are created the same. To produce the perfect fluorocarbon you have to start with the best raw materials attainable, which is the foundation for our Shinsei fluorocarbon. By using the purest, cleanest fluorocarbon crystals available we have produced the most invisible fluorocarbon on the market. After spending a tireless amount of hours in research and development with a team of Japanese engineers we have developed the perfect combination of strength, stretch and durability. The end result is a product which will absorb shock, while having the attributes needed for tying the perfect leader, or creating the ultimate top-shot. Whether you're fishing for huge tuna or stealthy steelhead Shinsei is the clear choice for leader material.

Gulf Coast Slam

Specialty Fluorocarbon Leader

P-Line's Gulf Coast Slam Fluorocarbon Leader was built to perform in the harsh conditions served up by the Gulf of Mexico. Whether you're launching Top Dogs across the flats of Matagorda Bay, soaking a croaker under a float down in Port O'Connor, or fishing off the oil rigs of Venice, GCS has the strength, durability, and invisibility to not only get bit, but to also put that fish in the boat! The production of GCS starts with using the best quality Japanese raw materials available and is manufactured using the latest in extrusion technology. Your target species might be speckled trout, redfish and flounder, but life in the Gulf is endless and you never know when you might be scrapping with a huge tarpon, a toothy king mackerel, or a powerful amber jack, which is why you need the toughest, strongest, most abrasion resistant fluorocarbon on the market, Gulf Coast Slam!

SS Fluorocarbon Leader

Salmon & Steelhead Leader

SS Fluorocarbon Leader was designed specifically for Salmon and Steelhead fishermen. The extreme invisibility of the line once it enters the water is one of the attributes which make it the perfect choice when fishing clear water conditions. SS Fluorocarbon has the toughness and abrasion resistance needed to be an awesome leader line, while maintaining enough flexibility to tie great knots. With the latest advancements in fluorocarbon raw materials and extrusion technology this product will raise the bar of what anglers come to expect out of fluorocarbon leader material.

Available in 6-40lb. test in 100 yard spools.

CFX Fluorocarbon Leader

100% Fluorocarbon Leader

CFX Fluorocarbon's refractive index makes it virtually invisible once it enters the water. The most obvious advantage of CFX Fluorocarbon is a more natural presentation to the fish. With its high abrasion resistance, low stretch factor and UV protectors it's no wonder that when it was introduced, the American Sportfishing Association awarded P-Line CFX Fluorocarbon "Best New Line Introduction of the Year". If you're in conditions with line-shy, leader-shy fish, using CFX Fluorocarbon can make the difference between excuses why they didn't bite, or the bragging rights of that catch of a lifetime. This could be the most important tool you add to your tackle arsenal.

Available in 2-60lb. test in 25 Meter spools.

SPIN-X Fluorocarbon Leader

Ultimate Spinning Reel Leader

P-Line Spin-X Fluorocarbon Leader has been engineered to be the ultimate spinning reel fluorocarbon leader. Utilizing 100% pure Japanese fluorocarbon, Spin-X Fluorocarbon Leader is incredibly clear and holds very little memory, making it perfect for tying long leaders for finesse techniques. Featuring high abrasion resistance and superb knot strength, Spin-X Fluorocarbon Leader has been produced for serious spinning reel enthusiasts. Pair these attributes with new, sought after line sizes, and Spin-X Fluorocarbon Leader will be your new go-to leader material for all spinning gear.

Available in 5, 7, 9, 11, and 13 pound test in 50 yard spools.

PANFISH LINE

Clear

Hi Vis Yellow

HP PANFISH

Specialty Panfish Line

HP PANFISH was developed for the crappie, sunfish, bluegill and yellow perch anglers of the world. Whether you're swimming a jig, huddled over a hole on the ice or soaking worms or minnows under a float, HP Panfish will exceed your expectations with its easy casting, memory free line which works great on spinning reels.

Available in Clear and Hi-Vis Yellow, in 2-8lb. test in 150 yard spools.

TROUT LINE & LEADER

HP TROUT

Specialty Trout Line

HP TROUT has all of the benefits an angler needs when gearing up to fish for trout. At P-Line when we think trout fishing, we envision small spinning reels, light line and stealthy presentations, which is why a line with very little memory is a necessity. HP-TROUT is a copolymer line made with a special blend of nylon proven to have strength and great castability.

Available in Clear, in 2-8lb. test in 150 yard spools.

HP LEADER

High Performance Leader

HP Leader is a high-performance copolymer line made with the best combination of polymers available. Anglers can expect this leader material to have great abrasion resistance, low stretch, high tensile strength and exceptional knot strength.

Available in Moss Green in 2-30lb. test in 50 yard spools.

ICE LINES

EndurX Ice Braid

Specialized Braid For Ice Fishing

When the temperature drops, your gear shouldn't quit. Endurx Ice Braid with **Aquashield** is engineered for the harshest winter environments, blending legendary braided strength with cutting-edge moisture defense.

Traditional lines often struggle with ice buildup and stiffness, but our specialized **Aquashield** coating actively sheds water. This prevents the line from absorbing moisture, ensuring it resists freezing even when the mercury hits rock bottom.

Floroice

The Best Ice Line Period

Floroice is a combination of copolymer with a silicon fluorocarbon coating. This unique blend offers a distinct tactical advantage through its superior invisibility and abrasion resistance and resists freezing, and stays limp in the coldest of conditions.

Because the fluorocarbon coating has a refractive index nearly identical to water, Floroice becomes virtually undetectable in crystal-clear winter water. This outer layer also serves as a shield protecting against jagged ice, ensuring that your line remains intact during battle. When you're heading out to hard water, there is only one line of choice, Floroice.

HP-ICE

Premium Ice Lines

P-Line cracks into the hard water market with the introduction of **HP-ICE** Copolymer. Ice fishing can pose a number of challenges and your line should not be one of them, which is why we developed a special blend of nylon to provide the angler with the perfect combination of strength, low memory, and abrasion resistance. This high-performance line is available in 100-yard spools and comes with a hard plastic storage case.

HP-FLUORO is a new fluorocarbon line developed by P-Line specifically for ice fishing. When the water turns hard it can be very tough on fishing line which is why HP-FLUORO was developed to be supple in cold temperatures while also retaining great strength and invisibility. Because HP-FLUORO is 100% pure fluorocarbon anglers can expect a quick sink rate, great abrasion resistance, while being virtually invisible.

SPECIALTY LINES

Hydrofloat

Floating Spectra® based line

Hydrofloat is a Spectra based line with a thermal fused coating. While originally designed for float fishing for both salmon and steelhead, Hydrofloat can be used in many applications and works well on both spinning and baitcasting reels,

The fused coating of Hydrofloat makes this line more buoyant than traditional Spectra lines, allowing the angler to have a drag free drift by always being able to see and manage the line on the surface.

When making long drifts anglers will appreciate the fact that Hydrofloat has virtually no stretch, which allows an angler to have a positive hook-set on extended drifts. Hydrofloat also has a high strength to diameter ratio. Available in 10, 15, 20, and 30 lb. test.

Original Leader

Heavy Copolymer Leader

For years P-Line Original Leader has set the standard for the serious fisherman. Its combination of supple feel, knot strength and abrasion resistance makes it one of the most dependable leaders available in the market. It's great for trolling lures or fly lining a bait to a waiting marlin. It also has the toughness to handle the battle that follows.

Angry Eye Predator

Shallow Diving Jointed Minnow

The Angry Eye Predator is a versatile 6 1/2 inch jointed minnow bait. If trolling is your preferred method of angling, the AEP will run at a depth range of 2-7 feet. Fish the AEP with a slow retrieve and a high rod tip and you can work the bait on the surface. The jointed body design ensures an erratic motion which allows the lure to really hunt for any species. With 3 counter balanced weights in the body of the AEP, and 6 hollow bb's in the center cavity, you can rest assured that you'll have the action and the vibration needed in any type of water conditions. Whether you're chasing huge snook, cagey lake trout or monster striped bass, the AEP is a clear choice for your path to success.

Predator Minnow

Deep Diving Jointed Minnow

The P-Line Predator is a deep diving, jointed bait with an action that makes it irresistible to many species of game fish, most notably striped bass. Trolled at 3-mph with 100 feet of line, the Predator will dive 12 to 13 feet. These lures are catching fish from coast to coast, in both salt and fresh water, under any conditions. The Predator features 3 counter balanced weights in the body of the lure which ensure great action and balance. The main body also has 6 hollow stainless steel BB's which create an irresistible rattling noise, attracting fish in the murkiest of water.

Laser Minnow

The Number One Jigging Minnow

The P-Line Laser Minnow is manufactured with a unique holographic laser tape, creating an amazingly life-like finish. The oblong shape and sharp cuts on the side allow for an erratic action when jigged. This action will trigger strikes from a number of species. The smaller sized Laser Minnows are effective in fresh water for Bass, Trout, and Kokanee; the medium sizes are effective on Lake Trout, Striped Bass and Salmon. While larger sizes were designed for Albacore, Dorado, and any type of bottom fish such as Halibut, Ling Cod or Rockfish.

The Laser-Reflective Surface

When the sun is high and the water is clear, visibility is all about flash. The Laser Minnow features a specialized holographic laser-tape finish designed to catch and amplify ambient daylight.

UV Paint Technology

UV paint absorbs ultraviolet light—which penetrates deeper into the water column than visible light—and reflects it back at a wavelength fish can see vividly.

Ultra-Glow Finish

In the true darkness of extreme depths or night fishing, movement isn't enough—you need a beacon. Some colors of the Laser Minnow are equipped with Ultra-Glow paint for maximum luminescence.

HARUKI JIG

THRU-BODY WIRE CONSTRUCTION

UNPARALLELED VISIBILITY

VACUUM CHROME PLATED

ASYMETRICAL BODY DESIGN

PREMIUM CHROME FLASH JIG

The Haruki Jig design allows it to have the best combination of strength, visibility, and fish catching action. This jig starts with a wire through the body construction and is rigged with BKK® 3X-Strong hooks and split rings. The Haruki also features high vacuum chrome plating, giving it unparalleled visibility and flash in the water. The asymmetrical body design - one side rounded, the other side with an edge, gives this jig a unique action whether vertical jigged, slow pitched, or cast and retrieved. The Haruki just flat-out fishes!

Unyielding Hooks

These hooks are forged from high-carbon steel and tempered for maximum elasticity. Featuring Hand-Ground technology and Super-Slide coating, these points impale through the toughest, boniest jaws.

Industrial-Grade Split Rings

The Haruki Jig is rigged with high-tensile stainless steel split rings that are built to withstand extreme torque. Designed with a memory-retaining temper, they won't gape or deform even after the most grueling battles.

'Sassin Jig Jigging Minnow

The 'Sassin has a unique cupped design on one side and the scaled finish on the other half of the body. The lure is rigged with a Mustad 3X strong hook, a solid welded ring, and a crane swivel on the eye of the lure. With the unique scaled finish and the cupped design, these jigs have an amazing flash. The 'Sassin also features two oversized, offset eyes for an even more life-like look! With the evolution of anglers using smaller jigs to catch huge fish, it was important to use great quality components. In both saltwater and freshwater, the 'Sassin has proven deadly, enticing tuna, bottom fish, rock cod, ling cod, salmon and striped bass. The 'Sassin is available in 1, 2, 3, 4 & 6 oz.

Tinsel Inserts

P-Line Tinsel Inserts added to the inside of any squid bait will enhance the look and action of the bait. By using a combination of mylar, and crystal flash, which are then embedded in a soft rubber head, these inserts are easy to use, and extremely effective. Available in 3 styles at 2.5", 4.5" and 5"

Twin Tail Squid

Live Action Twin Tails

The P-Line Twin Tail Squid is a versatile saltwater bait which is available in 4.5", 7" and 9 inch models. There are 6 colors in the assortment including 3 glow colors for low light and deep-water fishing conditions. The tentacles on this squid include two curl tailed legs which have amazing action and are guaranteed to entice vicious strikes from hungry gamefish. These squid bodies can be rigged on leaders for halibut and bottom fish, fished on jig heads for lingcod and rockfish or trolled for pelagics. Just about every fish in the ocean feed on squid so your only limitation is your imagination when it comes to rigging and fishing the new Twin Tail Squid.

Twin Tail Squid Rig

The Twin Tail Squid 2 Hook Rig, was designed to be fished around reefs, rock piles and oil-rigs. The main feature of this leader is the new twin tail squid bodies which have dual curl tail tentacles for extreme fish attracting action. The rig is tied on 50 lb. test with two 5/0 hooks and two 4.5" Twin Tail Squid bodies.

Twin Tail Halibut Leader

Our proven lineup of halibut leaders get an exciting addition with the new 7" Glow Twin Tail Squid added to the family. Because monster halibut live in deep, dark water we have added an extremely bright natural glow Twin Tail Squid to this leader, the tentacles on this bait include two curl tail legs which are sure to provide additional action when the current is running or the leader is jigged off the bottom. The leader features compression crimps, 300 lb. P-Line Original Leader material, and stainless steel circle hooks, available in 14/0, 15/0 and 16/0.

Halibut Leader with Glow Twin Tail Squid

Salmon/Steelhead Rig

Hand - Tied

The new P-Line Salmon/Steelhead Rigs have been made for the angler who wants the convenience of a pretied leader. The leaders are tied using 42" of P-Line's HP Leader material, a moss green line which has great abrasion resistance and strength. They feature a red octopus hook and use a double snell which allows for the angler to place their bait in the egg loop. There are 8 rigs per pack and come in hook and line sizes for both salmon and steelhead.

P-Line Halibut Leaders and Live Bait Rigs

Professionally Tied

P-Line Halibut Leaders and Live Bait Rigs are built for battling big fish in deep water. Each rig is professionally tied with tough, abrasion-resistant P-Line CXX leader, ensuring superior strength and durability. Outfitted with razor-sharp BKK hooks and premium components, these rigs are designed for maximum holding power and reliability under pressure. Whether you're targeting trophy halibut or other bottom species, you can trust these pre-tied rigs to perform. With high-quality swivels and hardware, they're ready to fish straight from the package—saving you time and giving you confidence every drop. Serious gear for serious anglers.

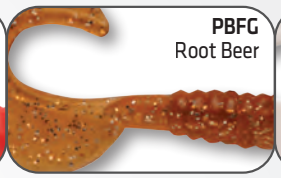
Bottom Fish Rigs

This assortment of two hook saltwater rigs are made specifically for fishing around reefs, rock piles, and wrecks. We offer Lingcod Rigs, Rockfish Rigs and Bottom Fish Grubs, the perfect assortment for what you're after.

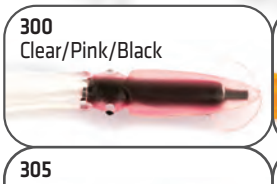
Bottom Fish Grubs

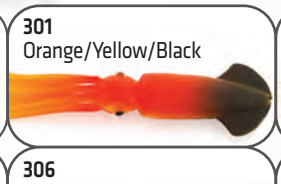
Bottom Fish Grubs are rigged with two 4.25 inch hook tail grubs glued onto 7/0 hooks. The leader is 50 lb. test and is 40 inches long. These grubs have amazing fish attracting action and are available in 5 colors. When you explore the depths of your favorite reef the P-Line Bottom Fish Grub rig is a great option.

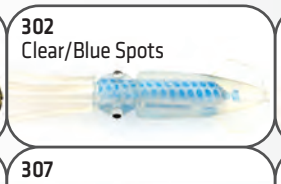


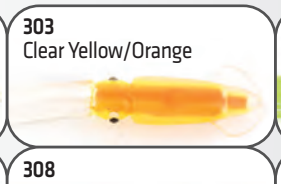
Ling Cod & Rock Cod Rig

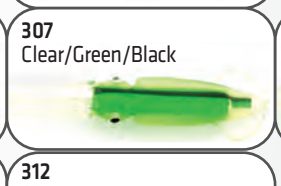
The Ling Cod Rig (PLCS45) is tied on 50 pound leader and rigged with two 7/0 hooks and two 4.5 inch bulb squids. There are 13 colors including 3 glow colors to choose from. Big ling cod love squid and octopus and these rigs have proven to be effective in tricking many lings into their last meal.
he Rock Cod Rig (PRCS35) is a smaller version of the highly effective Ling Cod Rig. At 3.5 inches these squid are the perfect length for school sized rockfish. This version is also tied on 50 pound leader, but uses a smaller 5/0 hook. When it's time to load the cooler with a limit of Rock Cod you'd better have one of these rigs in your arsenal.







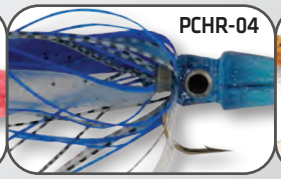


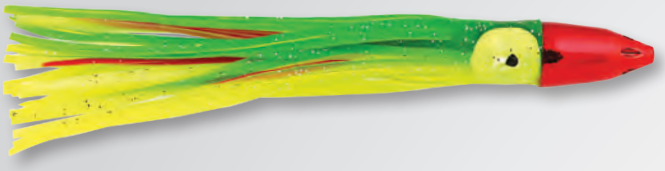


ROCK COD SQUID 3.5 INCH MFG # PRCS35-(COLOR CODE)
LING COD SQUID 4.5 INCH MFG# PLCS-45 (COLOR CODE)

Conehead Squid

The Conehead Squid is the newest addition to our saltwater lineup of bottom fishing products. This lure comes rigged on a 5 foot leader tied with 60 pound P-Line Leader Material. To the bottom of the leader you can attach your favorite jig such as a Diamond Bar, Laser Minnow, or Halibut Drop Jig. Thirty inches above the jig the Conehead squid is rigged on a loop knot which allows for maximum action. The Conehead itself is made of a sparkled acrylic, with oversized eyes, and 3 different types of tentacles. You're now able to fish two different profiles of baits, increasing your chance at success.





Tuna Ripper

The Tuna Ripper is a 1.7 ounce jet head designed with 5 ports that allow water to run through the bait, causing the ultimate bubble trail. And with 5 metallic head finishes and 10 skirt combinations, we've provided the ultimate tuna color combinations.

Striper Worm Tails

6" Hook Tail Worm

The Striper Worm Tail is the perfect compliment to any bucktail jig. The combination of a bucktail jig and worm tail has stood the test of time as one of the top lures for striped bass. The hook tail design has great action and vibration which makes it extremely effective for any saltwater or freshwater gamefish.
Available in 4 colors. 6 to a pack.

Pro-Steel Spoons

The Pro Steel lure was designed with the perfect cup and edges to give you the ultimate action. Equipped with a Siwash hook and a treble hook, P-Line has built a spoon which can be fished right out of the package. For best results the spoon should be swung through potential holding water by casting across the river, let the spoon sink and then allow the current to pull your line down stream coupled with a slow retrieve. This presentation should give you the perfect action to entice strikes. Available in 10 color combinations at 1/4, 2/5 and 2/3 ounce sizes. 6 to Pack.

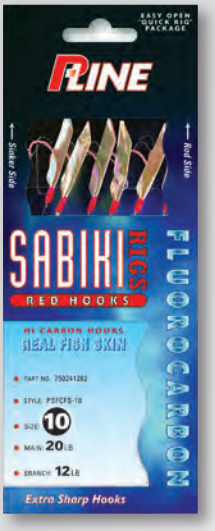
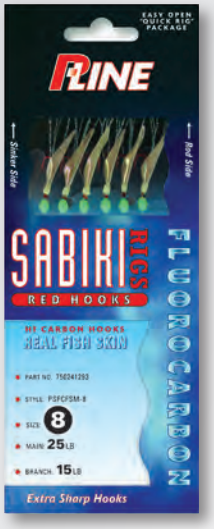
Sabikis

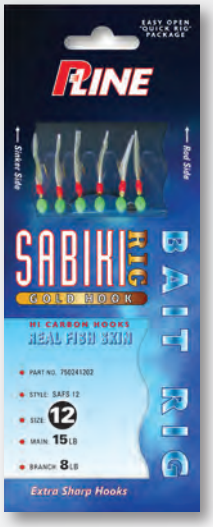
Combining the stealth of fluorocarbon with the attraction of a red hook, P-Line's lineup of Sabikis will help anglers catch baitfish in the toughest of conditions.

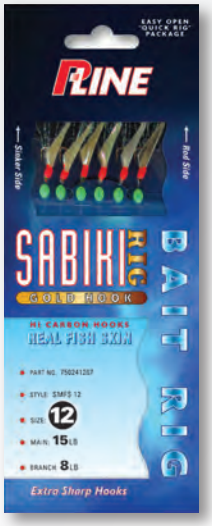




Fluorocarbon Red Hook Sabikis

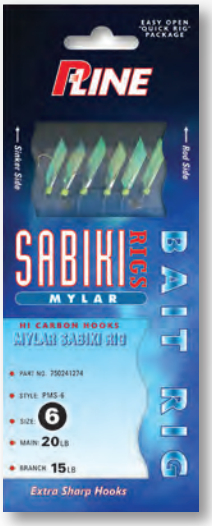
Fluorocarbon Sabikis are available with real fish skin, and real fish skin with mylar strands, tied on extremely sharp red hooks. Available in sizes 14, 12, 10, 8, and 6.





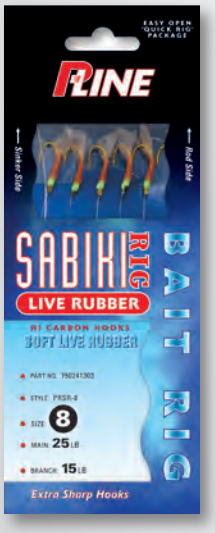
Gold Hook Sabikis

Gold Hook Sabikis are available with real fish skin, and real fish skin with mylar strands, tied on extremely sharp gold hooks. Available in sizes 14, 12, 10, 8, and 6.



Mylar Sabikis

Mylar Sabikis are equipped with reflective mylar wrapped, tied to extremely sharp gold hooks. Available in sizes 14, 12, 10, 8, 6, 4 and 2.



Live Rubber Sabikis

The P-Line Live Rubber Sabiki is designed to emulate a small shrimp or krill. With a light pink body tied onto a gold hook we've created the ultimate bait catching rig. The six hook rig is packaged on an easy to use card with directions. Available in sizes 14, 12, 10, 8, and 6.

American Shad Sabikis

The Shad Sabiki is designed to make fishing for this popular species as simple and effective as possible. Simply attach enough weight so your rig will stay in contact with the bottom.
A slight jigging motion will bring the fish skin mylar combination to life, ensuring violent strikes. All are equipped with 3, size 4 hooks and are available in chartreuse, red and natural.

Micro Squid Sabikis

Micro Squids feature a line through the weighted head design for a perfect presentation. Available in 4 and 2 hook variations in 2 sizes # 4 and 1/0. Size 4 is a 4 hook and size 1/0 is a 2 hook.

Popcorn Krill

The P-Line Popcorn Krill is a two hook feather rig which has proven to be deadly effective on a number of species including rockfish and ling cod. The Popcorn Krill are rigged on a single leader with two 5/0 hooks and are available in 6 color combinations. What separates this rig from our popular Farallon Feather Rig is the addition of a bulky head which creates a larger presentation in the water, and also provides a good surface to add scent without impairing the action of the feather.

Farallon Feathers

Made with the highest quality hooks and leaders, these feathers make great vertical jigs. Anglers from Mexico to the Pacific Northwest and Florida up through Canada are vertical jigging cod, rockfish, baitfish, smelt, croaker and various similar fish on these jigs. Available in 2 sizes 3/0 and 5/0 in 9 fish catching colors.

Silent Sticks

These lead stick weights feature a durable rubberized coating for stealthy, low-noise presentation and reduced snagging. The integrated rolling swivel eliminates line twist and tangles. Perfectly designed for smooth, controlled drifts—ideal for bobber dogging. Available in 1/4, 3/8, 1/2, 5/8, 3/4 and 1 ounce.

Bobber Weight Internal Structure

Draggin' Balls

Draggin Balls were created to be used under a float while bobber dogging. This new P-Line product is a steel ball with a rubberized coating specifically designed to drift more freely than lead because of the increased mass. Because the ball will drift with the current and bounce off of rocks it dramatically reduces snags. The ball is attached to a rolling swivel which turns 360 degrees so line tangles caused by your weight should be non-existent. Draggin Balls are available in 1/8, 1/4, 1/3, 1/2, 3/4 ounce.

Order #	Description	Model

P-Line Bobber Weights

The P-Line Bobber/Trolling Weight has a wire which connects both swivels through the inside of the weight. The lead helps to get your bait down quickly and improves your ability to properly weight the float. This same weight can be added as an inline trolling sinker for Trout and Kokanee fishing to help get your lure down to the proper depth. Available in 1/4, 3/8, 1/2, 5/8, 3/4 and 1 ounce.

P-line Bead Kits

6/8 Combo and 8/10 Combo

P-Line Bead Kits come in two configurations a 6mm/8mm and an 8mm/10mm combo, each complete with 9 great colors of beads in a unique 20 compartment box along with 2 sets of bead stoppers, at a very affordable price. The colors are designed to take advantage of a trout's instinctive urge to feed on protein rich salmon eggs. With a full set of directions on how to rig and fish the beads on the back of the package, anglers of all skill levels will have success with this assortment.

P-line Trout Kit

47 Pieces

The P-Line Trout Kit supplies all of the essential terminal tackle needed to bait fish for trout. The kit has various hooks, swivels and weights for different types of rigging options. There is also a 6 compartment, hard-sided, compact tackle box which can easily be tucked into your waders or your favorite fishing vest. Whether you're heading to the lake or a river this kit has the nuts and bolts needed for your trout fishing excursion.

P-line Trout Kit Deluxe

65 Pieces

The P-Line Deluxe Trout Kit will provide many different rigging options when it comes to pursuing trout. The terminal tackle will allow for multiple bait rigging options. There is also a spoon and a spinner which are two of the most proven trout lures, we've also included two clear adjustable bubbles, and two flies which allow for a more advanced fly-fishing technique. Whether you're in the Rockies, Sierras, or your local lake this kit has everything you'll need to be successful on the water.

The DART Baitfish Series is designed to imitate the natural forage sought by the world's gamefish. These lures can be used effectively to jig, troll, or cast for salmon, halibut, tuna, wahoo, yellowtail, bass, walleye and other salt and freshwater species.

Point Wilson Darts

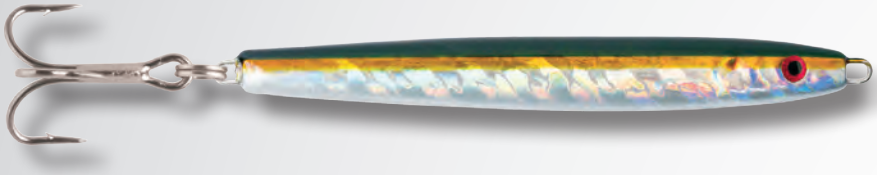
Natural Forage Baitfish Jig

These lures were created in a wide range of sizes and colors to suit just about any fishing condition. All Point Wilson DARTs are cast from meticulously detailed molds using only the best materials and workmanship,making them the industry standard for quality.

Point Wilson Dart jigs feature our proprietary coating technology, delivering an exceptionally tough finish built to handle the harshest underwater structure. Designed to stay intact around rocks, pinnacles, and reefs, this durable coating resists chipping and wear so your jig keeps performing drop after drop.

Mustad

Equipped With Mustad® Hooks



CANDLEFISH SERIES

The first Point Wilson DART was the Candlefish. This fish-catching legend has proven itself since 1981 on species ranging from salmon to bottom-dwelling halibut–and everything in between. Some know candlefish as sand lance, sandeels, needlefish, or launcefish. Gamefish just call them food. And with its slim profile and fast-sinking action, this is the lure that hooks those fish–trip after trip, year after year.

HERRING SERIES

The Herring completes the Baitfish Series. It imitates a wide variety of forage, including not only herring, but also sardines, alewives, shad and menhaden. This DART is a great combination lure. It has both a wide body for action and plenty of heft to get down deep. But the proof is in the fishing, and the Herring really puts 'em in the boat!

Mickey Jigs

The Pucci Mickey jig has withstood the test of time, and remained the favorite lure of many Surf Fishermen. With a chrome-plated or painted lead body, and an aerodynamic design, this lure will reach past the breakers to where the fish are holding. The hook is tied with a white bucktail for added attraction. Great for Stripers and Salmon on the Beach. 1 to a blister, 6 to a box, 144 to a carton.

Hard Beads

Pucci Hard Beads are the industry standard for durability, clarity, and versatility. Engineered to withstand the rigors of heavy use in both freshwater and saltwater environments, these beads provide the essential protection and attraction required for sophisticated rigging. Whether you are building salmon and steelhead drift rigs, protecting knots on Carolina rigs, or adding a flash of color to a high-speed trolling setup, G. Pucci & Sons delivers unmatched quality.

Available in 20 colors in 4 Sizes: 5mm, 6mm, 8mm, and 10mm.

Sliding Swivels

The Sliding Swivel is a must for any fisherman looking for an extra advantage when it comes to bait fishing. This unique swivel is used to attach your weight above your leader. Since the swivel is not fixed, a fish can swim away with your bait without feeling your weight.

Halibut Sliding Rigs

Halibut sliding rigs allow the bait to swim freely, while keeping it very close to the bottom, the target strike zone for halibut. The sliding weight system allows the strike to be seen on the tip of the rod, before the halibut feel the weight of the sinker. This rig is available with and without a stinger. Rig with stinger is shown. 1 to a pack. 12 to a box.

Order #	Size	Line	Stinger	Model

Sturgeon Rigs

With the new California Sturgeon regulations, you must fish with a single barbless hook which is why Pucci has made 16 different versions of rigs. You have the choice of a high end rig made with a Gamakatsu Octopus hook, or a more economically priced Khale style hook. The rigs are made with crimped wire leader and are available with or with out a slider in 5/0, 6/0. 7/0, and 8/0. All models are barbless.

Fly casting.
Easy to Use.

Fill with water to your required weight.

Clear Spin Floats

Clear spin floats have been a secret of trout fishermen for many years. This float allows a spin fisherman to cast small lures and flies a great distance by simply filling the float with water. The float can be fished at different depths depending on how much water is in the float.

2 Pack.
12 packs to a box. Best result with 5' to 7' of leader.

Float Stoppers

The Pucci float stoppers are made of a soft rubber amber material. Available in 3 sizes which allow you to match the correct sized stopper to your line diameter. This popular product will not only act as a float stopper, bass fishermen are now using stoppers to peg sinkers. Another use for these stoppers are to secure egg beads for trout and steelhead anglers. A must for any tackle box!

Order #	Description	Model

BECKMAN SIGNATURE FEATURES

BECKMAN HANDLES

Each Beckman net offers the choice of a 4', 6' or 4'-7' and 6'-9' extendable handle.

QUICK CONNECT CHANNEL

The Beckman Quick Connect Channel allows for an ultra-fast connection of the handle to the yoke.

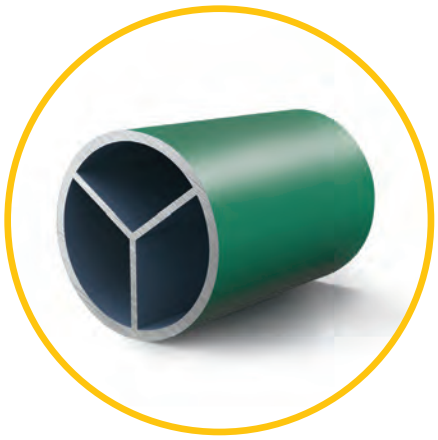
ONE PIECE YOKE

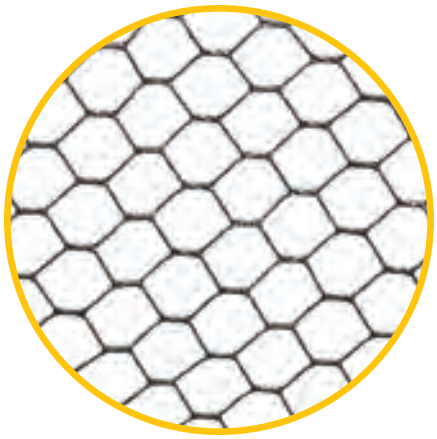
One of the signature features of Beckman is the incredibly durable once piece aluminum yoke which comes with a lifetime guarantee. The yoke is built with 1100 Aluminum and is connected to the hoop with 4 stainless steel screws and washers.

BECKMAN
Ph. 800.537.2394 Fax 415.468.9478 460 Valley Drive, Brisbane CA 94005

Y-BAR HOOP CONSTRUCTION

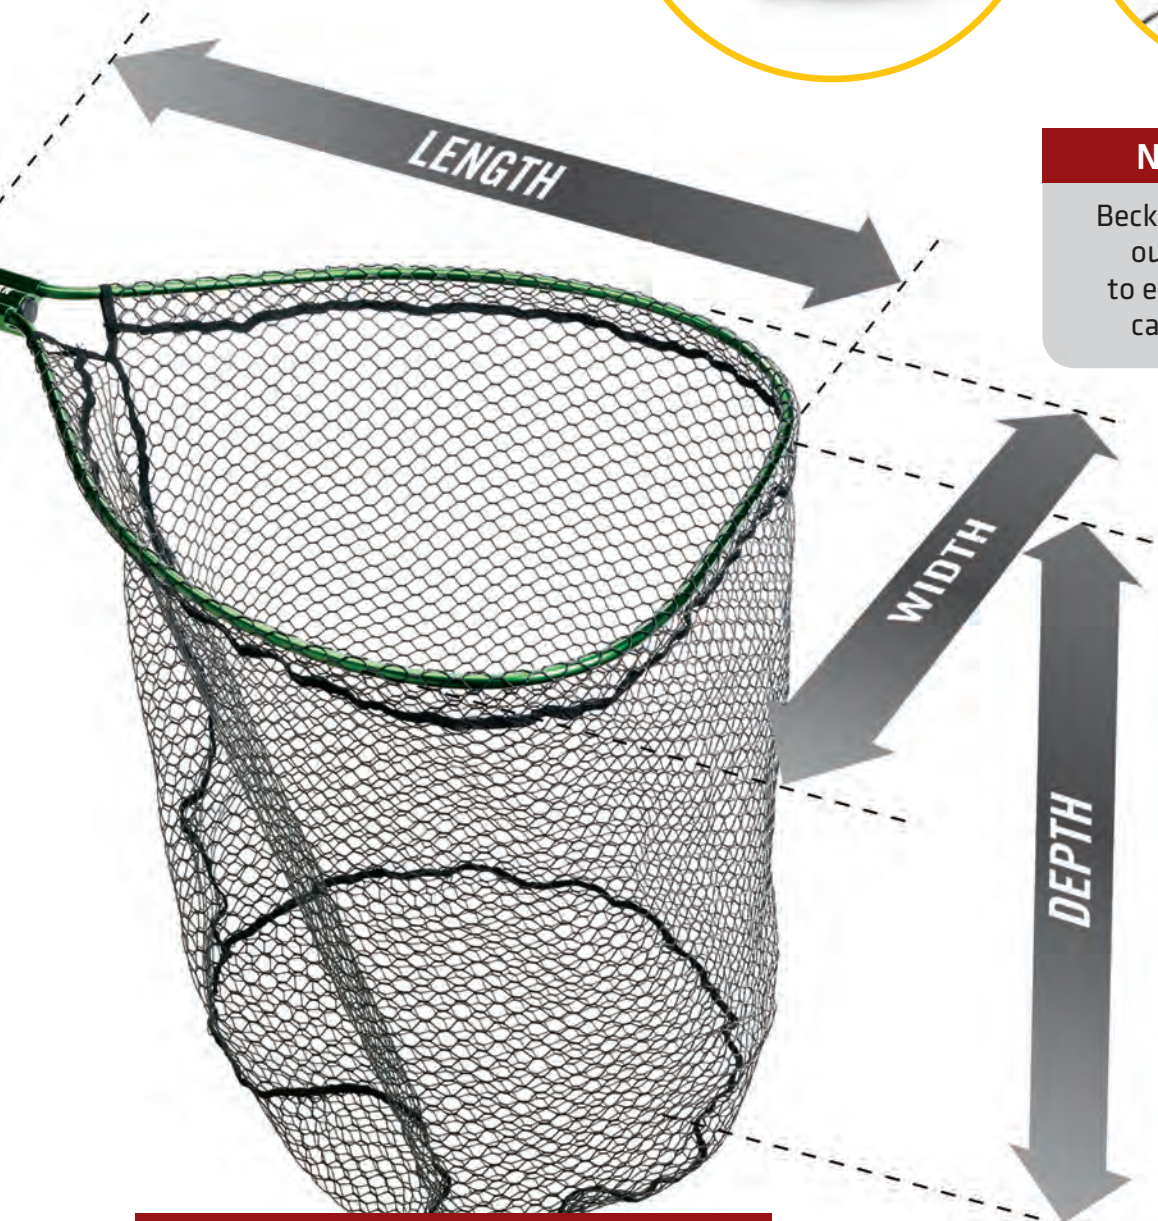
Most Beckman hoops feature an Internal Y-Bar construction which adds strength, rigidity, and directional stability to the hoop.





NET BAG MATERIAL

Beckman coated nets feature our fish-friendly coating to ensure the safety of your catch for proper release.



NET BAG DESIGN

Beckman Coated and PVC nets are designed to be fish friendly with a flat bottom which helps to reduce the stress on a fish prior to release. Nylon nets are designed to be extremely durable and have the ability to scoop very quickly in the water with less drag.

TWIST LOCK HANDLE

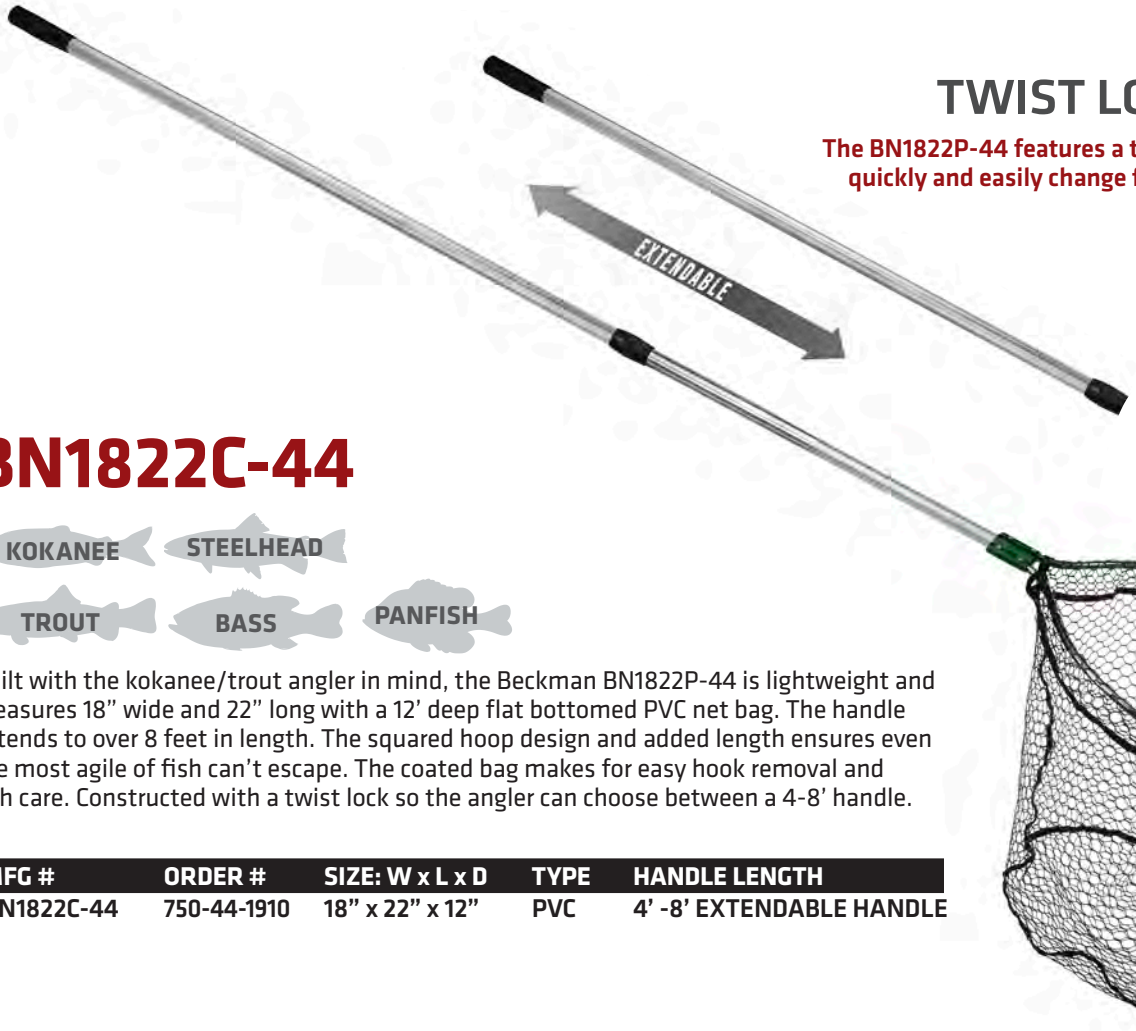
The BN1822P-44 features a twist lock handle that can quickly and easily change from a 4" to an 8' handle.



BN1822C-44

KOKANEE STEELHEAD TROUT BASS PANFISH

Built with the kokanee/trout angler in mind, the Beckman BN1822P-44 is lightweight and measures 18" wide and 22" long with a 12' deep flat bottomed PVC net bag. The handle extends to over 8 feet in length. The squared hoop design and added length ensures even the most agile of fish can't escape. The coated bag makes for easy hook removal and fish care. Constructed with a twist lock so the angler can choose between a 4-8' handle.

BN1116C-7

TROUT BASS PANFISH

The BN1116C-7 measures 11" wide and 16" long and has a 12" deep PVC net bag. It was built with the serious trout angler in mind. Constructed with a lanyard, the angler can attach it to a belt or buckle and keep it close for netting. The pvc bag keeps hooks tangle free and is great on the fish. The lightweight aluminum makes netting and carrying a net effortless.

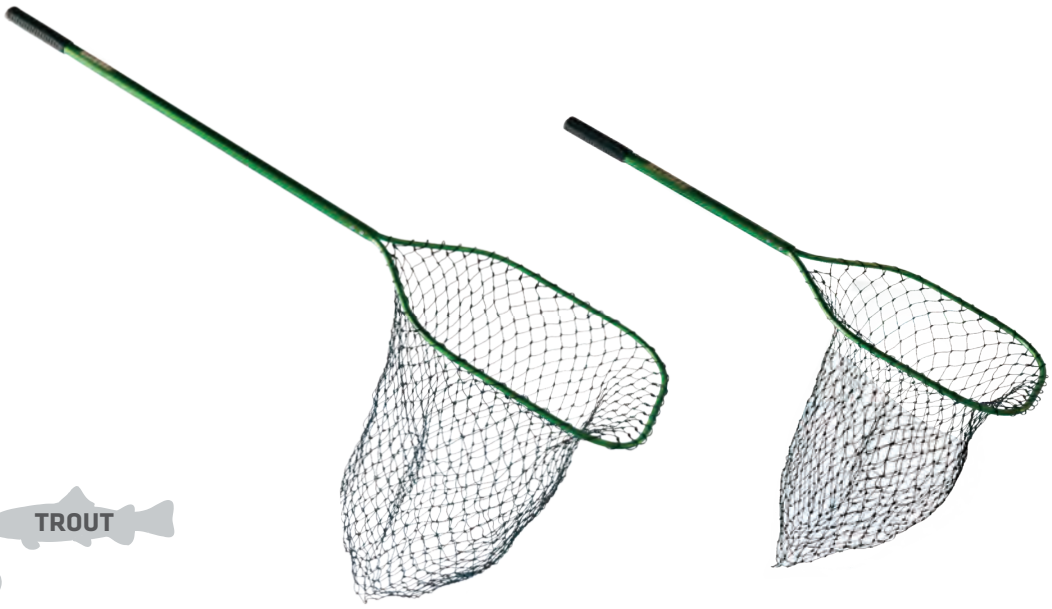
NET DETAIL
Beckman Fixed Handle Net



BN1419-18
BN1622-24

BASS PANFISH TROUT KOKANEE WALLEYE

The BN1419C-18 and BN1622C-24 are great all-purpose fixed handle nylon fishing nets. The BN1419C measures 14" wide by 19" long and has a 24" deep bag. The BN1622C-24 measures 16" wide by 22" long and features a 28" deep bag. These are light weight nets, which make them perfect for shore anglers or kayak fishermen. They feature a matching green anodization on both the handle and the hoop which will make them an extremely attractive part of your fishing arsenal. Another great introduction from Beckman!

BECKMAN FILLET KNIVES

BFK-7, BFK-8, BFK-9

Beckman has helped anglers land fish for over 50 years. We're now going to help you get them to the plate with our new line of fillet knives. The new Beckman knives come in three sizes 7", 8" and a dimpled 9" inch blade. These knives are built with an ergonomic soft touch handle and come with a vented sheath which allows the blade to dry completely while in the sheath preventing corrosion.

BECKMAN ROD RACK

The Beckman Rod Rack will help you manage your rods in your drift boat, pontoon boat or garage. The kit comes with all of the hardware needed for easy installation. There are 4 rod holders which can also be used to secure a net or gaff handle. It can be mounted horizontally or vertically and will help keep your rods evenly spaced to prevent unnecessary wear and tear.

MFG #	ORDER #	DESCRIPTION
BRH-4	750-12-0420	BECKMAN ROD HOLDER 4 RODS ALUMINUM

1ST GEN FISHING

JAW DROPPER UNDERSPIN

2-Pack

With forward facing sonar dominating the local and high-level tournament scene comes the need for baits designed to tempt weary, suspended bass into biting. With the Jaw Dropper Underspin, the bait engineers at 1st Gen Fishing have perfectly blended subtle movement with a reactionary fish triggering response. On a slow retrieve, the Jaw Dropper Underspin produces a gliding action the fish can't resist, provoking lethargic fish to strike.

A quick pop of the rod will produce a sharp, darting action much like a dying baitfish. Built with a 2/0 Mustad® Ultra Point™ hook, ball bearing swivel and #3 willow blade, the Jaw Dropper Underspin is the perfect option when casting to suspended fish looking for an easy meal.

*Available **2 to a pack** in 6 colors in 1/8oz, 3/16oz and 1/4oz sizes.*

JawDropper 4-Pack

SCAN TO WATCH PRODUCT VIDEO

Introducing the first "walk-the-dog" style jig head of its kind, the 1st Gen Jaw Dropper's action is truly remarkable. The mouth opened lead lip design gives the jig head a left-to-right action as you hop it off the bottom, giving bass an action they have never seen before. Affix any straight tailed worm, soft jerkbait or ned style plastic to the 1st Gen Jaw Dropper, and watch it come to life. The harder you snap your line, the more erratic the action. Featuring an ultra-sharp Mustad® Ultra Point™ hook, the 1st Gen Jaw Dropper will hook anything that comes in for a sniff, and the lip is designed to come through rocks and gravel with fewer hanging ups.

Vertical jigging for suspended fish with the 1st Gen Jaw Dropper is deadly. A slight twitch of the rod sends the Jaw Dropper dancing in a "figure 8" motion, and the 90-degree line tie will keep your bait perfectly horizontal, perfect for tempting weary, cold water bass.

Utilize the 1st Gen Jaw Dropper as a swimbait head and a few slack line twitches will have your bait darting left to right, producing reaction strikes you would never get with a standard swimbait head. Perfect for 2"-3.5" swimbaits, the 1st Gen Jaw Dropper is the ultimate finesse swimbait head.

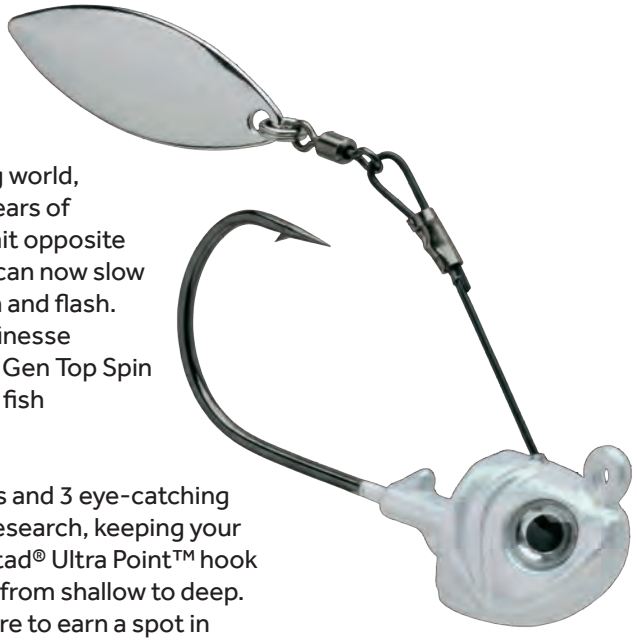
TopSpin



The first of its kind and starting a new category in the fishing world, the 1st Gen Top Spin is detailed from top to bottom. After years of research and development, 1st Gen Fishing has created a bait opposite an underspin. Featuring a #2 or #3 willow blade on top, you can now slow roll a bait along the bottom while the blade continues to spin and flash. Built with an AFW® titanium wire, you can now give fish the finesse presentation of an underspin in and around cover, as the 1st Gen Top Spin will swim through trees and brush piles with ease, giving the fish something they have never seen before.

Each head has been finely detailed, showcasing gills, 3D eyes and 3 eye-catching colors. The plastic keeper has been selected after years of research, keeping your bait intact longer for multiple uses. Utilizing a premium Mustad® Ultra Point™ hook and coming in 4 sizes, the 1st Gen Top Spin has you covered from shallow to deep. Shake it, swim it, skip it, or drag it, the 1st Gen Top Spin is sure to earn a spot in every fisherman's tackle boxes for years to come.

Available in 3 colors in 3/16oz, 1/4oz, and 3/8oz sizes.

HEAVY DUTY TopSpin

Featuring all of the unique details of the original but in a bulked-up version, the 1st Gen Fishing Heavy Duty Top Spin is built for large fish both in freshwater and inshore. After years of research and development, 1st Gen Fishing has created a bait opposite an underspin. Featuring a #3.5 willow blade on top, you can now slow roll a bait along the bottom while the blade continues to spin and flash. Built with a titanium wire, you can now give fish the presentation of an underspin in and around cover, as the 1st Gen Heavy Duty Top Spin will swim through trees, brush and kelp with ease, giving the fish something they have never seen before.

Each head has been finely detailed, showcasing gills, 3D eyes and 4 eye-catching colors. The plastic keeper has been selected after years of research, keeping your bait intact longer for multiple uses. Utilizing a 30-degree premium Mustad® Ultra Point™ swim jig hook and coming in 2 sizes, the Heavy Duty Top Spin has you covered from shallow to deep. Shake it, swim it, skip it, or drag it, the 1st Gen Heavy Duty Top Spin is sure to earn a spot in your tackle box.

Available in 4 colors in 1/2oz, and 1oz, sizes.

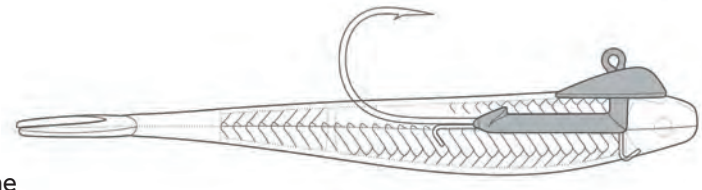
TOP ROLL
JIG HEAD



The 1st Gen Fishing Top Roll Jig Head is designed for an effortless rolling/quivering action when rigged on top of your minnow. Equipped with two wire bait keepers, the first keeps the chin securely in place, allowing you to catch multiple fish on a single bait, saving time and money. Featuring a sticky sharp Mustad® Ultra Point™ hook, the Top Roll ensures instant hookups.

Available in 1/0, 3/0, and 5/0 hooks in 1/4oz, 1/5oz, and 1/6oz sizes.

SPLITBLADE

Built around two willow leaf blades with a 50/50 split color construction, the 1st Gen Fishing Split-Blade Spinnerbait produces maximum flash and color variation on each blade rotation. The Split-Blade has been meticulously designed to feature every component an angler is looking for in a high-end spinnerbait.

Engineered with size 4 and size 4.5 willow blades and flash/color construction, the bass can't resist the Split-Blade. Featuring a .37mm super stainless steel wire frame and handtied 50 strand silicon skirt, the bait undulates as it swims through the water. The business end comes equipped with a 5/0 Mustad® Ultra Point™ spinnerbait hook and a wire bait keeper to hold your favorite trailer in place. Finished with ultra-realistic paint jobs and lifelike skirts, the 1st Gen Fishing Split-Blade is a winner all year long.

Available in 5 colors in 3/8oz, and 1/2oz sizes.

SPLITBLADE COMPACT

Designed with more weight on the hook shank to create a smaller profile and two 50/50 split color construction willow blades, the 1st Gen Fishing Split-Blade Compact Spinnerbait produces maximum flash and color variation with each blade rotation. The Split-Blade has been meticulously designed to feature every component an angler is looking for in a high-end spinnerbait.

Engineered with size 3.5 and size 4 willow blades to create a smaller, bite sized meal perfect to tempt a hungry bass. Featuring a .35mm super stainless steel wire frame and handtied 50 strand silicon skirt, the Split-Blade Compact undulates as it swims through the water. The business end comes equipped with a 5/0 Mustad® Ultra Point™ spinnerbait hook and a wire bait keeper to hold your favorite trailer in place. Finished with ultra-realistic paint jobs and lifelike skirts, the 1st Gen Fishing Split-Blade Compact is a winner all year long.

Available in 6 colors in 3/8oz, and 1/2oz sizes.

CopperHead
Bladed Jig

Built to push the limits of vibration and sound, the 1st Gen Fishing Copperhead Bladed Jig features a direct connect blade-to-head design that delivers instant startup the moment it hits the water and keeps the bait running deeper in the strike zone throughout the retrieve. Designed with two copper-plated BBs molded directly into the head, the Copperhead produces an unmatched acoustic signature. As the blade rocks side to side, it strikes the BBs to create a loud, high-pitched rattle that fish have never heard from a bladed jig. Combined with the direct connection, this interaction produces an aggressive, unstable hunting action with even the slightest rod twitch or reel turn.

The Copperhead is equipped with a durable wire bait keeper to securely hold your favorite trailer in place. At its core, a 5/0 Mustad® Ultra Point™ spinnerbait hook is molded into the head for superior strength and extended reach, ensuring solid hook-sets. Finished with ultra-realistic paint schemes and hand-tied skirts, this bait delivers premium performance and fish-triggering appeal in any condition.

Available in 12 colors in 3/8oz, 1/2oz, and 3/4oz sizes.

MINI COPPERHEAD BLADED JIG

The 1st Gen Fishing Mini Copperhead Bladed Jig is a compact version of the original Copperhead Bladed Jig. Now built with a direct connect blade-to-head design, the bait delivers instant startup and stays down in the strike zone from the moment it hits the water.

Designed with a 50% reduction in blade size and built around a smaller 3/0 Mustad Ultra Point Hook, the Mini Copperhead has a bite-sized profile and much tighter vibration. Designed with two copper bb's in the head, the blade strikes the bb's on the retrieve, creating a high-pitched rattle the fish have never heard before from a bladed jig. The clashing of the blade against the bb's creates an unstable, hunting motion.

The 1st Gen Mini Copperhead Bladed Jig features a wire bait keeper to secure your favorite trailer in place. The skirt has been hand tied for added durability. Finished with ultra-realistic paint jobs, the 1st Gen Fishing Mini Copperhead is a must-have in your arsenal.

Available in 8 colors in 3/8oz, and 1/2oz size

HD Swimbait 3-Pack

Whether you are fishing for striped bass, redfish, or calicos inshore or hunting down big bass on your local lake, the 1st Gen HD Swimbait Heads have been designed with premium components at an economically friendly price point. Built around a 2X strong Mustad® Ultra Point™ hook, you can be ready to fight the meanest fish in your water. The HD heads are engineered with a recessed line tie to help your swimbait navigate through thick cover and vegetation. The triple lead bait keeper ensures you are able to snugly rig both hollow and solid body swimbaits. The custom taper on the head allows the head to roll from side to side on the retrieve, making an irresistible meal to nearby fish.

EXTROVERT

Designed with an ultra-clean T-bar construction and two metal blades with clackers, the 1st Gen Fishing Extrovert Buzzbait is sure to draw attention from near to far. With each rotation, the metal blades hit against the clackers, creating a very loud, clanking sound fish can't resist. The blades on the Extrovert are counter-rotating, spinning outwards to mimic the splashing of baitfish as the bait travels through the water. Engineered with a smaller, more compact profile, the Extrovert will catch everything from smallmouth and spotted bass to trophy largemouth.

Featuring a wire bait keeper, the Extrovert will hold any of your favorite soft plastic trailers in place. The business end comes equipped with a razor-sharp 5/0 Mustad® Ultra Point™ hook. Finished with realistic paint jobs and lifelike skirts, the 1st Gen Fishing Extrovert Double Buzzbait is the perfect addition to your topwater arsenal.

FOOTBALL WEIGHTS

6-Pack

1ST Gen Fishing Football Weight provides anglers with a more efficient way to explore rocky terrain. It gives the bait a freedom of movement that can't be achieved with ordinary fixed jig designs. Additionally, the un-fixed connection reduces the possibility of a bass using the jig as leverage to spit the hook.

This extremely versatile weight that can be used with an array of techniques. The football shape is great at coming through rock, gravel and hard bottom, and it can be used as a drop-shot weight, free rig weight, or as a Carolina rig weight.

It's a new way to fish your favorite baits.

*Available **6 to a pack** in 2 colors in 1/8oz, 3/16oz, 1/4oz, 3/8oz, and 1/2oz sizes.*

DropShot
